To assist insurers in submitting compliant medical liability rate/rule filings, the Department has created this separate, comprehensive rate/rule filing checklist for medical liability filings.

*Please see the separate form filing checklist for requirements related to medical liability forms.

All filings are public record in accordance with 215 ILCS 5/404 except where another provision of the Insurance Code says otherwise. The only code section that allows for a filing to be a trade secret or confidential is 215 ILCS 157/40 Use of Credit Information in Personal Insurance Act.

The Department's checklists include summaries that do not provide detailed information about all laws, regulations and bulletins. Therefore, the insurers should review the actual laws, regulations and bulletins to ensure forms are fully compliant before filing with the Department.

A form filing fee is required pursuant to 215 ILCS 5/408 (1)(jj).

Rates shall not be excessive, inadequate, or unfairly discriminatory.	215 ILCS 5/155.18	In the making or use of rates pertaining to all classes of medical liability insurance, rates shall not be excessive, or inadequate, nor shall they be unfairly discriminatory.
		Rate and rule manual provisions should be defined and explained in a manner that allows the Department to ascertain whether the provision could be applied in an unfairly discriminatory manner. For example, if a rate/rule manual contains ranges of premiums or discounts, the provision must specify the criteria to determine the specific premium/discount an insured or applicant would receive.
		The Director may, by order, adjust a rate or take any other appropriate action at the conclusion of a hearing.

Such standards may measure any difference among risks that have a probable effect upon losses or expenses. Such classifications or modifications of classifications of risks may be established based upon size, expense, management, individual experience, location or dispersion of hazard, or any other reasonable considerations, and shall apply to all risks under the same or substantially the same circumstances or conditions.
