

2011 Cost Containment Annual Report to the Illinois General Assembly

Pat Quinn
Governor

Michael T. McRaith
Director of Insurance

Illinois Department of Insurance

PAT QUINN
Governor

MICHAEL T. McRAITH
Director

To the Honorable Members of the General Assembly:

The Illinois Insurance Cost Containment Act requires the Director of Insurance to submit an annual report to the General Assembly containing an analysis of portions of the Illinois insurance market and a recommendation of the most appropriate and comprehensive cost containment system for the state (Article XLII, 215 ILCS 5/1202d).

In accordance with Section 1202 of the Illinois Insurance Code, [215 ILCS 5/1202] I am pleased to submit the Annual Report to the General Assembly on Insurance Cost Containment for 2011. It contains significant information from a national and Illinois perspective regarding the current conditions of the property and casualty insurance industry.

Sincerely,

Michael T. McRaith
Director of Insurance

OVERVIEW

Section 1: OVERALL PROPERTY / CASUALTY INDUSTRY SUMMARY

This section provides and compares details of the Illinois property / casualty marketplace to nationwide data. It also provides a breakdown of all property / casualty premiums written on a regional basis and by significant line of business within Illinois.

Section 2: INDIVIDUAL LINE OF COVERAGE ANALYSIS

This section provides a detailed review of each of the following areas of insurance within the state of Illinois.

- Homeowners
- Private Passenger Auto Liability
- Private Passenger Auto Physical Damage
- Commercial Auto Liability
- Medical Malpractice
- Other Liability
- Workers Compensation

One aspect of each line of business monitored by the Department is market concentration. The Herfindahl/Hirschmann Index or (HHI) is a measure of the size of companies and is widely accepted as an accurate indicator of the amount of competition among individual companies in any given marketplace. The HHI is calculated by the summation of the squares of each company's individual market share. Generally, an HHI of 1800 or above is an indication that the given market may be highly concentrated and may be approaching anti-competitive behavior.

Section 2 contains a historical graph of the (HHI) for each of the lines of business indicated above. For all of the lines studied only the medical malpractice line continues to be considered highly concentrated in Illinois. This situation is not new and continues to be monitored by the Department.

Section 3: RESIDUAL MARKET MECHANISMS

Residual Market Mechanisms are established to provide specific insurance coverages to Illinois consumers who are unable to buy coverage in the open or voluntary markets. Coverages available to Illinois consumers through residual markets include property coverage, automobile coverage, and workers compensation coverage.

The residual markets (FAIR Plan, Auto Plan, and Workers Compensation Assigned Risk Pool) all have very small shares of the market which indicates healthy competition. The Workers Compensation market share is the largest at 2.8 percent but notably has been declining since 2003.

In addition to residual market mechanisms Section 3 details recent activities of the surplus lines market. Illinois consumers unable to obtain coverage in either the voluntary market or the residual market mechanisms may be able to obtain coverage in

the surplus lines market. The report reflects nothing of concern with the Surplus lines market mechanisms however the Department has little regulatory control regarding coverage placed in the Surplus lines market.

Section 4: OVERALL MARKETPLACE CONDITIONS

Lastly, the report identifies and examines several financial principles that are generally accepted measurements of market reliability and profitability. The Department recognizes that economic and market conditions during 2008 had dramatic effect on the short term profitability of the Property & Casualty industry in Illinois. The Department will continue to monitor all available data related to the Property & Casualty insurance industry to assure that a healthy, competitive, and reliable insurance market remains available for all Illinois consumers.

SECTION 1: OVERALL PROPERTY / CASUALTY INDUSTRY SUMMARY

The following table provides a breakdown of total direct written premium and incurred losses for the property / casualty industry by state for the past 5 years.

Direct written premium in Illinois totaled \$19.3 billion in 2009, representing 5.4 percent of the total written premium nationwide. For the first time in three years Property / Casualty losses in dropped in Illinois. As reflected below the overall loss ratio dropped from 66.7 percent in 2008 to 66.1 percent in 2009.

Total US Property/Casualty Industry (\$ In millions)

* Direct Pure Loss Ratio is calculated by dividing losses incurred by direct earned premium.
Source: NAIC State Data Network; aggregate Schedule T for all property/casualty insurers.

The following map identifies the percentage of total written premium and loss ratio for the property / casualty industry in ten regions of the United States during 2009 as well as the 5-year average.

Distribution of Direct Written Premium & Loss Ratios by Region

2009	Pacific	Mountain	Northwest Central	Southwest Central	Northeast Central	Southeast Central	Mid-Atlantic	South Atlantic	New England	Other*	Total All Regions
% Total DPW	14.4%	6.8%	8.2%	9.0%	15.1%	5.1%	14.4%	19.5%	4.4%	1.2%	100.0%
Direct Loss Ratio	53.5%	63.3%	58.6%	60.9%	65.5%	62.1%	67.1%	63.1%	51.9%	62.2%	61.5%
Loss Ratio – 5 year average	53.0%	56.9%	60.3%	75.5%	61.6%	68.9%	64.8%	58.3%	51.9%	52.9%	60.6%

*Other includes Puerto Rico and the U.S. Virgin Islands, Canada, American Samoa, Guam and N. Mariana Islands

A review of the loss data by region continues to show a higher than average loss ratio in the Southwest Central and Southeast Central regions. The higher ratios are generally attributed to the severity and frequency of hurricane and severe storm season in these regions.

The following graph reflects the distribution of all Illinois property / casualty insurance premiums written during 2009. Personal lines of insurance include homeowners; private passenger automobile liability, and private passenger automobile physical damage coverage. Combined, these coverages make up approximately 44 percent, up from 41 percent in 2008; of the overall property / casualty insurance written in the state of Illinois.

Percent of All Property/Casualty Premiums Written in Illinois by line (2009)

SECTION 2: INDIVIDUAL LINE OF COVERAGE ANALYSIS

HOMEOWNERS

The following table compares homeowners' insurance written in Illinois to the nationwide market. The data indicates that written premiums rose both nationally and in Illinois during 2009. The Illinois market had a larger increase at almost 7 percent versus an increase of 4.1 percent nationally during the period.

Homeowners' Underwriting Results (2009)

Homeowners (\$000 omitted)	Illinois*	Nationwide**
Direct written premiums	2,593,403	48,962,059
Direct earned premiums	2,495,453	47,633,764
Expenses (% premium)		
Incurred losses	68.6%	60.0%
Def. & cost cont. exp. Incurred	1.3%	1.6%
Comm./brokerage	13.0%	13.1%
Taxes, licenses & fees	1.3%	2.4%

* NAIC State Data Network, 2009 Illinois State Page Exhibit

** NAIC State Data Network 2009 Insurance Expense Exhibit Part III

The following chart provides a comparison of incurred losses for homeowners' insurance over the past 5 years. As indicated below, the loss ratio for both the Illinois and nationwide markets experienced a significant decrease during 2009. Incurred losses in Illinois decreased approximately 10.8 percent during 2009 while nationally incurred losses decreased by 10.6 percent during the same period.

Homeowners' Losses as a percent of Earned Premiums (2005 - 2009)

The following graph reflects the HHI for Illinois homeowners' insurance from 2005 through 2009. As the following chart shows, the homeowners' insurance market available to Illinois consumers continues to exhibit a healthy stable level of competition for Illinois consumers. Based on the data available, the system for cost containment appears to be appropriate for Illinois consumers.

Illinois Homeowners' Insurance Market Concentration

The following table identifies the top ten writers of homeowners' insurance in Illinois based on written premium in 2009. In summary, the ten companies identified wrote over 1.8 billion dollars in written premium and combined for a total of 70 percent of the total Illinois market share in 2009.

Homeowner Coverage Descriptions

Homeowners' Insurance is generally purchased in one of several standard coverage types. The coverage types acknowledged as industry standards include HO-1, HO-2, HO-3, HO-4, HO-5, HO-6, & HO-8

- **Basic Form (HO-1)** – The most basic coverage type providing coverage against 11 specific factors or perils: fire, lightning, smoke, vandalism, theft, ice, snow, windstorm, hail, riot, and volcano eruption. The popularity of this policy has diminished over the years due to the policies extensive coverage gaps.
- **Broad Form (HO-2)** – HO-2 policy forms are also considered a basic coverage form but with a wider scope of coverage than the HO-1. Coverage under an HO-2 policy is limited to 17 perils specifically listed in the policy.
- **Special Form (HO-3)** - Offers property and liability coverage for the dwelling, other structures, and loss of use of the dwelling and other structures for all perils specifically listed in the policy (e.g., fire, lightning, windstorm and hail, falling objects, etc.). Personal property is also covered for perils listed in the policy. HO-3 covers more perils than an HO-2 policy.
- **Tenants Form (HO-4)** - Provides coverage for a renter's personal property, liability, and additional living expenses.

- **Comprehensive Form (HO-5)** - Covers your home and personal property for everything that is not specifically excluded in your policy. This type of policy provides the broadest coverage available but is not offered by all insurers and is usually more expensive. Personal property coverage under an HO-5 is generally broader than an HO-3 policy.
- **Condominium Form (HO-6)** - Covers a condominium owner's personal property and any additions and alterations made to the inside of the owner's unit. Condominium owners can also buy endorsements to protect property and for liability associated with their shares in the condominium association's common ownership.
- **Modified Coverage Form (HO-8)** - Provides coverage when an older home's replacement cost far exceeds its market value. This form allows the policyholder to carry lower limits of insurance rather than try to maintain 80% of replacement cost. The HO-8 policy provides varying methods of loss payment depending on whether the damaged or destroyed building is repaired or replaced.

The following table summarizes the amount of written premium paid by Illinois homeowners' during 2009 for each of the coverage types identified above.

Type of coverage	2009 Illinois Premium	Market Share
HO-1	23,577,183	0.97%
HO-2	70,460,436	2.91%
HO-3	1,077,443,033	44.51%

Comm./brokerage	10.7%	8.7%
Taxes, licenses & fees	1.0%	2.3%

* NAIC State Data Network, 2009 Illinois State Page Exhibit

** NAIC State Data Network 2009 Insurance Expense Exhibit Part III

As reflected in the following chart, the loss ratio for private passenger automobile liability insurance in Illinois has continued to remain essentially identical to the countrywide ratio for each of the past five years.

Private Passenger Auto Liability Losses as a percent of Earned Premiums (2005 -2009)

As previously mentioned, an HHI of 1800 or above can be an indication of a highly concentrated and possibly anti-competitive market. As reflected below, consumers of private passenger automobile liability insurance in Illinois continue to enjoy a stable, highly competitive market. Based on the measures below, the system for cost containment appears to be appropriate for Illinois consumers for private passenger automobile insurance.

Illinois Private Passenger Auto Liability Insurance Market Concentration

The following table identifies the top ten writers of private passenger automobile liability insurance in Illinois based on written premium in 2009. In summary, the ten companies identified wrote a total of over 1.94 billion dollars in written premium and combined for a total of 61 percent of the total Illinois market share in 2009.

Taxes, licenses & fees	1.0%	2.2%

* NAIC State Data Network, 2009 Illinois State Page Exhibit

** NAIC State Data Network 2009 Insurance Expense Exhibit Part III

As with private passenger liability insurance, the loss ratio for private passenger physical damage coverage experienced by Illinois consumers continues to be essentially identical to the loss ratio experienced by consumers nationwide.

Private Passenger Auto Physical Damage Losses as a percent of Earned Premiums (2005 - 2009)

As private passenger liability insurance and private passenger physical damage are closely associated and generally marketed jointly the market concentration of the two lines of insurance should be closely related. As reflected in the following chart department research continues to indicate Illinois consumers are experiencing a healthy and competitive automobile physical damage market.

Illinois Private Passenger Auto Physical Damage Insurance Market Concentration

The following table identifies the top ten writers of private passenger physical damage insurance in Illinois based on written premium in 2009. In summary, the ten companies identified wrote a total of over 1.54 billion dollars in premium and combined for a total of 63 percent of the total Illinois market share in 2009.

COMMERCIAL AUTOMOBILE LIABILITY

The following table compares underwriting results for commercial automobile liability insurance written in Illinois with that written countrywide during 2009. Written premiums for commercial automobile liability coverage in Illinois continued to experience a decrease during 2009. The Illinois market experienced a drop of approximately 89 million dollars or 11.5 percent during the period. Nationally, written premiums for the market decreased by 1.5 billion or 9.5 percent during 2009.

Commercial Auto Liability Underwriting Results (2009)

Commercial Auto Liability (\$000 omitted)	Illinois*	Countrywide**

* NAIC State Data Network, 2009 Illinois State Page Exhibit

** NAIC State Data Network 2009 Insurance Expense Exhibit Part III

As reported with other lines of insurance examined in this report and summarized below, the loss ratio experienced by Illinois consumers in the commercial automobile liability market does not appear to be significantly different from similar markets throughout the nation.

Commercial Auto Liability Losses as a percent of Earned Premiums (2005 - 2009)

As reflected in the following graph, the very low and stable HHI for the Illinois commercial automobile liability market continues to confirm a competitive market is available to Illinois consumers. Based on these results the system for cost containment appears to be appropriate for Illinois consumers in this market.

Illinois Commerical Auto Liability Insurance Market Concentration

The following table identifies the top ten writers of commercial automobile liability insurance in Illinois based on written premium in 2009. In summary, the ten companies identified wrote a total of approximately 201 million dollars in premium and combined for a total of 29 percent of the total Illinois market share in 2009.

MEDICAL MALPRACTICE LIABILITY

The following table compares underwriting results for medical malpractice liability coverage written in Illinois with that written countrywide during 2009. As with several of the previous lines, the medical malpractice markets continued to see reduction in premium volume during 2009. The reduction in written premium for the Illinois market was just over 37 million dollars or approximately 7 percent from 2008. Countrywide, the reductions totaled approximately 138.8 million or 3 percent from 2008 totals.

Medical Malpractice Liability Underwriting Results (2009)

Medical Malpractice Liability (\$000 omitted)	Illinois*	Countrywide**
Direct written premiums	494,943	4,435,116
Direct earned premiums	496,656	4,471,642
Expenses (% premium)

Taxes, licenses & fees	1.5%	2.0%

* NAIC State Data Network, 2009 Illinois State Page Exhibit

** NAIC State Data Network 2009 Insurance Expense Exhibit Part III

The significant reduction in loss expenses during 2006 are generally attributed to enactment of Public Act 94-677 in 2005. As reflected in the chart below, the medical malpractice market in Illinois has generally been able to maintain that reduction in the subsequent years. The Department will monitor insurers' results in future years in light of the Illinois Supreme Court decision in *Lebron v. Gottlieb*, No.'s 105741 and 105745, which held Public Act 94-677 unconstitutional.

Medical Malpractice Liability Losses as a Percent of Earned Premiums (2005 – 2009)

The following graph highlights the market concentration for medical malpractice carriers in Illinois between 2005 and 2009. Consistent with most states, the largest writer of medical malpractice insurance in Illinois remains a physician-affiliated company. In Illinois that provider is ISMIE Mutual Insurance Company, which wrote 64.7 percent of the medical malpractice coverage in 2009. The second largest medical malpractice insurer, by direct written premium, was American Physicians Assurance Corp., which wrote only 6.8 percent of the Illinois market. Although reduced in each of the last two years, the HHI for the Illinois medical malpractice Insurance market continues to indicate a highly concentrated and potentially anti-competitive market.

The following table identifies the top ten writers of medical malpractice insurance in Illinois based on written premium in 2009. In summary, the ten companies identified wrote a total of approximately 443.6 million dollars in premium and combined for a total of 90 percent of the total Illinois market share in 2009.

Taxes, licenses & fees	1.3%	-2.3%

* NAIC State Data Network, 2009 Illinois State Page Exhibit

** NAIC State Data Network 2009 Insurance Expense Exhibit Part III

As illustrated in the following chart the loss ratio for other liability insurance written in Illinois has continued to fluctuate at a level slightly above the overall national loss ratio. In consideration of the increase in written premium the small increase in the loss ratio does not appear to be an issue of concern at this time.

Other Liability Losses as a percent of Earned Premiums (2005 - 2009)

As with all other lines addressed in this report, the Department has determined the HHI for the other liability market available to Illinois consumers. The following graph confirms that the market continues to be very competitive and that the current market regulation systems related to this line of insurance appears to remain appropriate for Illinois consumers.

Illinois Other Liability Insurance Market Concentration

The following table identifies the top ten writers of other liability insurance in Illinois based on written premium in 2009. In summary, the ten companies participating in the other liability market wrote a total of approximately 753 million dollars in premium and combined for a total of 40 percent of the total Illinois market share in 2009.

WORKERS COMPENSATION INSURANCE

The following table compares underwriting results for workers compensation coverage written in Illinois with that written countrywide during 2009. As with numerous other lines examined in this report, the workers compensation market experienced a decrease in written premiums in both the Illinois market and on a national basis. The Illinois market experienced a decrease of 10.1 percent while nationally the decrease was 8.9 percent in written premium.

Workers Compensation Insurance Underwriting Results (2009)

Workers Compensation(\$000 omitted)	Illinois*	Countrywide**
Direct written premiums	2,283,983	28,651,733
Direct earned premiums	2,340,688	29,171,876
Expenses (% premium)		
Incurring losses	83.3%	66.7%
Def. & cost cont. exp. Incurred	8.1%	7.8%
Comm./brokerage	7.4%	7.7%
Taxes, licenses & fees	2.4%	4.3%

* NAIC State Data Network, 2009 Illinois State Page Exhibit

** NAIC State Data Network 2009 Insurance Expense Exhibit Part III

As illustrated below, the loss ratio related to workers compensation activity in Illinois continues to remain higher than the national average. It should also be noted that the Illinois loss ratio has increased 14.7 percent in the last two years compared to 6.7 percent nationally.

Workers Compensation Losses as a percent of Earned Premiums (2005 - 2009)

As with all other lines addressed in this report, the Department has determined the HHI for the Workers compensation market available to Illinois consumers. Based on available data it appears the Illinois Workers Compensation market contains sufficient insurers to maintain a competitive market for Illinois employers.

Illinois Workers Compensation Insurance Market Concentration

The following table identifies the top ten writers of workers compensation insurance in Illinois based on written premium in 2009. In summary, the ten companies identified wrote a total of approximately 611 million dollars in premium and combined for a total of 26.7 percent of the total Illinois workers compensation market in 2009.

SECTION 3: RESIDUAL MARKET MECHANISMS

States establish residual market mechanisms to provide coverage for consumers who are unable to buy coverage in the voluntary market. Illinois residual market mechanisms provide essential insurance coverage for the hard-to-place risk at rate levels approved by the Department. Illinois has residual market mechanisms for three lines of insurance: property, automobile, and workers' compensation.

PROPERTY

The Illinois FAIR Plan Association (FAIR Plan)

Fire and homeowners' insurance are placed directly through the Illinois FAIR Plan. Both personal and commercial insurance is available to consumers. Insurance companies share in the FAIR Plan's profits and losses in proportion to their voluntary market shares.

In Illinois, property insurance is widely available in the voluntary marketplace and only a very small percentage of consumers obtain coverage through the FAIR Plan. In addition, Illinois consumers are not at a coverage disadvantage when they buy insurance from the FAIR Plan, as is the case in many other states. In other states, residual market programs offer only dwelling fire or basic homeowners' policies. Illinois has one of the most progressive plans in the nation. Through the FAIR Plan, Illinois consumers can buy virtually the same coverages that are available in the voluntary marketplace, including guaranteed replacement cost, sewer back-up, earthquake, and building ordinance and law endorsements.

The following table summarizes the amount of dwelling and homeowner premium written by the FAIR Plan in Illinois from 2005 through 2009. As reflected in the data, the consistently low market share reflects a very healthy & competitive primary insurance market.

Written Premiums for Illinois FAIR Plan (2005-2009)

	Amount of Written Premiums	As % of Total Written Premiums
2005	\$9,073,367	0.37%
2006	\$7,018,505	0.28%
2007	\$6,047,739	0.23%
2008	\$5,258,275	0.19%
2009	\$5,193,870	0.20%

Source: Premium amounts provided by Illinois FAIR Plan

AUTOMOBILE

The Illinois Automobile Insurance Plan (Auto Plan)

Private passenger automobile risks are assigned to automobile insurers on a rotational basis in proportion to their share of the voluntary market. Assignments stay with the company and are not shared with other insurers. Commercial automobile risks are placed through servicing companies. Losses are divided among the voluntary writers of commercial automobile insurance in proportion to their share of the voluntary business.

The following table identifies the annual market share from 2005 through 2009 for the Illinois Automobile Insurance Plan compared to nationwide data. The percent of written car-years is derived by dividing the number of written car-years insured through the residual market by the total number of written car-years insured through the voluntary market.

As indicated by the data, a comparison of the Illinois market share to the nationwide ratio reinforces the fact that the voluntary auto insurance market in Illinois is extremely effective.

Percent of Automobiles in the Illinois Assigned Risk Plan and the United States Composite Automobile Residual Market (2005-2009)

	2005	2006	2007	2008	2009
Illinois	0.04%	0.03%	0.02%	0.01%	0.01%
Nationwide	1.24%	1.12%	1.00%	.89%	0.86%

Source: AIPSO Facts 2009 (based on liability car-years)

WORKERS' COMPENSATION

The Illinois Workers' Compensation Assigned Risk Pool (Pool)

Several insurers act as servicing carriers for the Illinois Workers' Compensation Assigned Risk Pool. Losses are divided among the voluntary writers of workers' compensation in proportion to their shares of the voluntary business.

The following table highlights the percent of Illinois workers' compensation premiums written through the Pool between 2005 and 2009. As reflected by the downward trend in premiums written through the pool, the Illinois workers compensation market continues to remain competitive.

Percent of Illinois Workers' Compensation Written Through the Pool (2005-2009)

	2005	2006	2007	2008	2009
Percent of Total	6.2%	4.7%	4.0%	3.7%	2.8%

Source: National Council on Compensation Insurance (NCCI)

All insurers who write workers' compensation insurance are assessed a fee to fund the Assigned Risk Plan. The Take-Out Program allows each insurer who removes an employer insured through the Plan to be eligible for a credit against their assessed fee. The following table compares total credits during 2008 and 2009.

One factor contributing to the recent reduction of credits is the decrease in amount of coverage placed through the pool. As more coverage is placed in the voluntary market, the Assigned Risk Plan has less coverage available for the Take-Out Program. As indicated by these findings, the Workers Compensation market continues to remain competitive at this time.

Illinois Take-Out Credit Results in 2008 and 2009

Year	Total Number of Policies Approved	Approved Credit
2008	7,272	\$45,097,266
2009	5,974	\$28,584,489

Source: National Council on Compensation Insurance (NCCI)

The following table ranks the top ten employment classes by the amount of premium written through the Assigned Risk Plan. The majority of the classes identified below are consistently in the top ten coverages written through the pool. New to the top ten this year include: Firefighters & Drivers – Volunteer and Taxicab Co: All other Employees & Drivers.

Illinois Residual Market Top Ten Classification Codes by Premium Volume for 2009

Rank	Code	Description	Total State Premium	% of Premium

SURPLUS LINES ASSOCIATION

Insurance placed in the Surplus lines market is written by a non-admitted (unlicensed) insurer through a licensed surplus lines producer. The licensed producer must exercise due diligence in protecting the insured since the Department has little jurisdiction over

unlicensed companies and the Illinois Insurance Guaranty Fund provides no protection for the consumer. Thus, it is the producer and not the Department who must determine the company's financial stability and standards of management prior to submitting the risk.

The following table outlines the number of policies written in Illinois from 2005 through 2009 by surplus lines producers for homeowners', private passenger auto liability and physical damage, commercial auto liability, medical malpractice, and other liability coverage. The dramatic increase in policies written in the surplus lines market reported in 2009 can be linked directly to a new automobile liability product providing indemnity coverages not normally provided by an automobile liability policy. In 2009 the number of policies written in the surplus lines market increased by 37.9 percent but the overall amount of written premium actually decreased by 7 percent during the same period.

As indicated above, the Department has little regulatory authority over this market. The ability to determine the competitiveness and health of the surplus lines market continues to be difficult to determine by the Department at this time.

Surplus Lines - Number of primary and excess policies written in Illinois (2005 - 2009)

Line of Business	2005 Illinois Policy Count	2006 Illinois Policy Count	2007 Illinois Policy Count	2008 Illinois Policy Count	2009 Illinois Policy Count
Homeowners'	535	352	357	385	644
PPA Liability	189	124	157	129	22,572
PPA Physical Damage	7,426	5,722	7,049	4,348	5,865
Commercial Auto Liability	77	148	121	149	166
Medical Malpractice	892	940	1,160	1,084	979
Other Liability	26,137	25,696	29,001	26,414	26,157
Grand Total -all policies-	65,738	61,935	67,738	62,622	86,378

SECTION 4: OVERALL MARKET PROFITABILITY & FINANCIAL REGULATION

Businesses that provide a financial service must be financially sound. An insurance contract has little value to the insured if there is no guarantee that the insurance company will have the money to pay claims when needed. In determining whether the overall marketplace is viable the Department has considered a number of factors related to profitability and financial solvency.

PROFITABILITY

One measure of a company's financial performance is its profitability. Any for-profit organization must generate enough profit to survive and succeed. In a given month, if expenses exceed income they must be paid from reserve funds. If the trend continues, reserve funds run out causing the business to collapse. Therefore, it is imperative that insurance companies manage income and expenses to assure profitability and survival. When the majority of insurers in the market are competitive and profitable, the market is considered to be financially strong. As with the economy as a whole; various indicators throughout this section appear to indicate some level of recovery in 2009.

One measure of overall profitability is change in policyholders' surplus. This ratio measures a company's ability to increase policyholder security. Policyholders' surplus is made up of: 1) underwriting gains or losses; 2) investment gains or losses; and 3) net contributed capital and other surplus changes. The following chart summarizes the change in policyholders' surplus for the Illinois-licensed property/casualty industry as a whole over the past five years.

**Change in Policyholders' Surplus
(2005 – 2009)**

Source: NAIC State Data Network

Another measure of overall profitability is return on policyholders' surplus. This ratio measures a company's overall profitability from underwriting and investment activity after taxes. It represents the financial cushion that protects policyholders in case of unexpectedly high claims. The return on Policyholder surplus is determined as the sum of the net income after dividends, taxes, and unrealized capital gains divided by the average of the current year and prior year's policyholders' surplus.

The following chart summarizes the aggregate return on policyholders' surplus from 2005 through 2009 for the overall Illinois-licensed property/casualty industry. As previously identified, the substantial losses in unrealized capital gains resulting from the market conditions during 2008 had dramatic effects on policyholder surplus for the overall insurance industry.

**Return on Policyholders' Surplus
(2005 – 2009)**

Source: NAIC State Data Network

The following table provides a summary of income from investments, net income, unrealized capital gains/losses and policyholders' surplus from 2005 to 2009 for all property casualty insurers licensed in Illinois. As referenced above, the economic and market conditions during 2008 significantly affected unrealized Capital Gains (Losses) and the surplus overall by extension.

**Net Investment Income Earned, Net Income,
Unrealized Capital Gains/Losses and Policyholders' Surplus (in millions)**

	2005	2006	2007	2008	2009
Net Investment gain	\$53,915	\$53,434	\$59,558	\$32,268	\$36,798
Net Income	39,675	61,230	56,685	6,578	28,520
Unrealized Capital Gains/Losses	4,096	28,677	8,131	(53,876)	28,925
Policyholders' Surplus	441,620	498,408	531,200	470,670	529,402

Source: NAIC State Data Network

UNDERWRITING EXPERIENCE

The following table identifies the aggregate underwriting gain/loss for Illinois-licensed insurers from 2005 - 2009. As reflected below, the decrease in earned premium was the main force responsible for the posting of negative net underwriting gains.

Aggregate Net Underwriting Gain (Loss) (in millions)

	2005	2006	2007	2008	2009
Premiums earned	\$344,913	\$359,332	\$362,387	\$361,832	\$348,552
Losses incurred	213,774	191,391	205,225	241,197	211,845
Loss expenses incurred	45,351	42,950	42,990	41,872	43,006
Other underwriting expenses Incurred	90,570	96,724	98,687	98,441	96,373
Dividends to policyholders	<u>1,040</u>	<u>2,540</u>	<u>1,359</u>	<u>1,146</u>	<u>1,375</u>
Net underwriting gain/loss	<u>(5,822)</u>	<u>25,727</u>	<u>14,126</u>	<u>(\$20,824)</u>	<u>(\$4,047)</u>

INVESTMENT INCOME

One component of surplus is income derived from investments. The net investment income ratio measures income from invested assets relative to earned premiums. It is calculated by dividing net investment income (income from invested assets less investment expenses and depreciation on real estate) by earned premium.

The following chart shows the net investment income ratio for Illinois-licensed property/casualty insurers during the last five-year period. This ratio indicates the investment income component of overall profitability.

Source: NAIC State Data Network

INSURANCE REGULATION PRINCIPLES

Although the Department cannot guarantee an Illinois-licensed insurer's profitability, we do monitor the financial solvency and strength of Illinois-licensed insurers in several ways including:

1. Maintaining a staff of trained accountants and specialists trained to identify a company's developing financial difficulties. The Department can then take steps to minimize potential losses to Illinois policyholders;
2. Working closely with insurance companies with identified financial difficulties to minimize potential risk to policyholders, while attempting to resolve manageable problems or determine the need for rehabilitation or liquidation;
3. Employing field examiners for on-site evaluation of insurance company financial records;
4. Reviewing operations and compliance issues through scheduled, targeted, and special exams of known or suspected problems;
5. Maintaining a staff of actuaries who monitor the adequacy of loss reserves, cash flow testing, and proper valuation of assets;
6. Licensing and registering the many types of insurers, surplus lines producers, and risk sharing pools authorized by the Illinois Insurance Code and related Acts; and
7. Investigating unauthorized organizations or individuals thought to be conducting illegal insurance operations and taking regulatory action to remove them from the market to protect consumers from fraudulent activities.
