2006 Annual Report to the Illinois General Assembly on Insurance Cost Containment

Rod R. Blagojevich, Governor

Dean Martinez, Acting Secretary Michael T. McRaith, Director of Insurance

Illinois Department of Financial and Professional Regulation

Division of Insurance

ROD R. BLAGOJEVICH Governor DEAN MARTINEZ Acting Secretary

Michael T. McRaith Director Division of Insurance

April 15, 2006

To the Honorable Members of the 95th General Assembly:

The Illinois Insurance Cost Containment Act requires the Director of Insurance to submit an annual report to the General Assembly by April 15th containing an analysis of the Illinois insurance market and a recommendation of the most appropriate and comprehensive cost containment system for the state (Article XLII, 215 ILCS 5/1202d).

In accordance with Section 1202 of the Illinois Insurance Code, I am pleased to submit the Annual Report to the General Assembly on Insurance Cost Containment for 2006. This Report contains national and Illinois-specific information regarding the underwriting results for the property and casualty industry for the year 2004.

In the first years of this decade, the property and casualty insurance industry experienced a hardening of some markets, a trend that continued through 2004. The Division's supplement to this Report, containing 2005 financial and underwriting information, will be ready for publication in mid-June.

Sincerely,

Michael T. McRaith Director of Insurance

Appendix E: Consolidated Exhibit of Premiums and Losses in the State of Illinois for All Illinois-licensed Property/Casualty Insurers During 2004.

Appendix F: Consolidated Insurance Expenses Exhibit Part III of Illinois-licensed Property/Casualty Insurers for 2004.

PURPOSE OF THIS REPORT

The Division of Insurance is required by statute to submit an Annual Report to the Illinois General Assembly on Insurance Cost Containment by April 15th of each year containing an analysis of the Illinois insurance market and a recommendation of the most appropriate and comprehensive cost containment system for the state.

The law was enacted in 1986 in response to the public's growing concern about the availability and affordability of property and liability insurance. It mandated that a uniform system be created for the collection, analysis and distribution of insurance cost data. Its expressed intent was to permit and encourage competition among companies on a sound financial basis to the fullest extent possible and to establish a mechanism to ensure the provision of adequate insurance at reasonable rates to the citizens of Illinois.

DIRECT PREMIUMS WRITTEN AND LOSS RATIOS BY STATE

Figure 1 shows a breakdown of total direct premium written (DPW) and losses incurred for the property/casualty industry by state from 2000 through 2004.

Direct written premium in Illinois totaled \$21.2 billion in 2004, representing 4.5 percent of total written premium nationwide. Property/casualty losses in Illinois, as a percent of direct earned premium, accounted for 62.1 percent in 2004, a decrease of 8 percent from the previous year.

^{*} Direct Pure Loss Ratio is calculated by dividing losses incurred by direct earned premium.

Figure 2 shows total direct written premiums and losses for the property/casualty market for ten regions of the United States during 2004 and the average over the last five years.

Figure 2
Distribution of Direct Premiums Written and Loss Ratios by Region

Source: 2003 & 2004 data: NAIC State Data Network; aggregate 2003 & 2004 Schedule T for all property/casualty insurers. Data for years 2000 through 2002 from Best's Aggregates & Averages-Property/Casualty, United States and Canada, Supplement, 2003 Edition.

			Northwest	Southwest	Northeast	Southeast	Mid-	South	New		Total All
	Pacific	Mountain	Central	Central	Central	Central	Atlantic	Atlantic	England	Other*	Regions
Percent Total 2004 DPW	17.0%	6.0%	6.6%	10.0%	14.4%	4.8%	14.8%	17.5%	5.4%	3.1%	100.0%

Direct Loss Ratio – 5 Yr Avg	65.0%	65.1%	67.6%	71.7%	70.6%	70.5%	74.2%	66.4%	61.1%	53.2%	68.4%

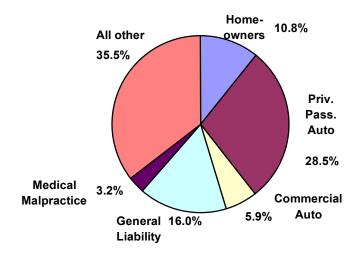

^{*}The "other" region includes American Samoa and Guam, Puerto Rico and the U.S. Virgin Islands and Canada.

The South Atlantic region experienced the highest combined direct loss ratio (losses incurred divided by earned premium) in 2004, due mainly to four hurricanes and one tropical storm that made landfall in the state of Florida. It marked the first time since record keeping began in 1851 that four hurricanes hit one state in a single year. The 2004 hurricane season (June 1 through November 30) saw 15 named storms, nine of these becoming hurricanes. Of those nine hurricanes, six were considered "major" with sustained winds at 110 mph or more. The 2005 hurricane season was even worse, with 26 named storms, 14 developing into hurricanes, exceeding the 1969 record by two.

Figure 3 illustrates the distribution of property/casualty premium written by line of business during 2004 in Illinois. As the chart shows, personal-lines insurance (homeowners and private passenger automobile) makes up the largest portion of the property/casualty market. Private passenger automobile (28.5 percent), including both the liability and physical damage component, is the single largest line of insurance. Cost Containment data are reported to the Division pursuant to Illinois Administrative Code Title 50, Chapter I, Subchapter iii, Part 4203 – "The Cost Containment Data and Reporting Requirements" for the following lines of business: private passenger automobile (liability and physical damage separately), homeowners (including residential fire), commercial automobile liability, and specified insurance classes from the medical malpractice and other liability lines.

Figure 3

Percent by Line of All Property/Casualty Premiums Written in Illinois (2004)

Source: NAIC State Data Network

ANALYSIS OF THE MARKETPLACE

From both a consumer's and a regulator's standpoint, insurance regulation should provide an environment where:

- Coverage is available.
- Coverage is offered at a reasonable price.
- Coverage is available from reliable insurers.

The Cost Containment Act requires the Division to analyze the marketplace each year and to recommend changes that may be needed to correct market problems.

The Division measures the overall competition of the Illinois marketplace by looking at three elements: availability, profitability and reliability.

Availability

The Division measures availability in three ways:

- 1. Herfindahl/Hirschman Index (HHI) and Market Shares by Line.
- 2. Market Shares of Residual Market Mechanisms.
- 3. Participation in Alternative Risk Transfer Mechanisms.

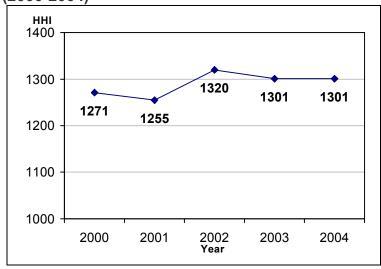

Herfindahl/Hirschmann Index (HHI) and Market Shares by Line

The Cost Containment Act requires the Division to collect and analyze data in five major lines of business: homeowners', private passenger automobile, commercial automobile liability, medical malpractice, and other liability. This report contains a comparison of underwriting results for Illinois versus nationwide for these five lines of business and an analysis of market concentration and market share in the State of Illinois. Market concentration is determined using an economic measure known as the Herfindahl/Hirschmann Index (HHI). The HHI is the summation of the squares of each company's market share. Generally, an HHI of 1800 or above is an indication that the market may be too highly concentrated and may be approaching anti-competitive behavior. *Homeowners HHI*

Figure 4 provides a graph of the HHI for Illinois homeowners' insurance from 2000 through 2004. Concentration in the homeowners market in Illinois has been relatively stable over the past five years.

Figure 4

The top ten Illinois homeowners' writers (including residential fire) and their market shares for 2004 and 2003 are shown in **Figures 5** and **6**.

Losses incurred, defense and cost containment expenses incurred and taxes, licenses and fees are shown as a percent of earned premium. Commission and brokerage expenses are shown as a percent of written premium.

The top ten Illinois homeowners' writers (including residential fire) and their market shares for 2004 are:

State Farm Fire & Casualty Company	24.0%
Illinois Farmers Insurance Company	9.9%
Allstate Insurance Company	6.6%
Country Mutual Insurance Company	5.4%
American Family Mutual Insurance Company	4.9%
Allstate Indemnity Company	4.9%
Economy Premier Assurance Company	3.4%
Travelers Personal Insurance Company	2.5%
Auto Owners Insurance Company	1.7%
The Farmers Automobile Insurance Assoc.	1.7%
Total	65.0%

Homeowners' data are collected pursuant to Cost Containment Data and Reporting Requirements (Part 4203). Again this year, cost containment data for homeowners' are summarized for the entire State of Illinois, the City of Chicago, and downstate Illinois. State Farm Fire & Casualty Company continues to rank first in all three categories. Most insurers that write in downstate Illinois also have a presence in the City of Chicago. There were 179 insurers reporting homeowners' business throughout the state and 166 companies reporting direct written premium in the City of Chicago. This business represents homeowners' multi-peril coverage written in HO-1, HO-2, HO-3, HO-5 and HO-8 policies.

On a statewide basis State Farm Fire & Casualty Company ranked first in condominium and renters insurance followed by Illinois Farmers Insurance Company, Allstate Indemnity Company and Allstate Insurance Company. There were 156 other companies also writing this coverage in Illinois.

State Farm Fire & Casualty Company wrote the largest amount of mobile home coverage followed by Progressive Casualty Insurance Company, Pekin Insurance Company, Allstate Insurance Company, Auto Owners Insurance Company, and Country Mutual Insurance Company.

The top ten writers in the entire State of Illinois homeowners' market are:

State Farm Fire & Casualty Co.

The top ten Illinois commercial automobile liability writers for 2004 are:

Transguard Insurance Company of America Inc.	10.6%
American Country Insurance Company	7.0%
American Service Insurance Company Inc	4.4%
Cincinnati Insurance Company	4.0%
Northland Insurance Company	3.8%
Occidental Fire & Casualty Company Of NC	3.5%
Progressive Premier Ins Co of Illinois	3.3%
Lincoln General Insurance Company	3.0%
West Bend Mutual Insurance Co	3.0%
Canal Insurance Company	2.6%
Total	45.2%

Pursuant to Cost Containment Data and Reporting Requirements (Part 4203), data are collected for specified classes of commercial automobile liability insurance through the Cost Containment filings. Two groups of particular interest are: taxis and public livery and other (excluding taxis and public livery).

American Country Insurance Company exhibits a large share of the taxis and public livery class of commercial automobile liability insurance. Fifty four other companies compete for the remaining market share in this class, seven more companies than reported in 2003. The Department carefully monitors this market due to American Country Insurance Company's significant market share in this class. American Country Insurance Company insures the two largest taxicab firms in Chicago and the State of Illinois. Because this is such a specialized market, the concentration of business is not alarming.

The top five admitted writers in this market are:

American Country Insurance Company American Service Insurance Company Inc. Lancer Insurance Company Sentry Select Insurance Company Rockford Mutual Insurance Co

The other classes of commercial automobile liability insurance collected represent the fleet and non-fleet combined trucks, tractors, and trailers classes in this line. These classes remain very competitive in Illinois. A total of 239 companies reported positive written premium in 2004, with 83 companies writing in excess of \$1 million in premium, a increase of 3 companies over 2003. The surplus line market wrote 55 policies and \$2,636,586 in premium for this coverage. This represents an increase of 33 policies from 2003.

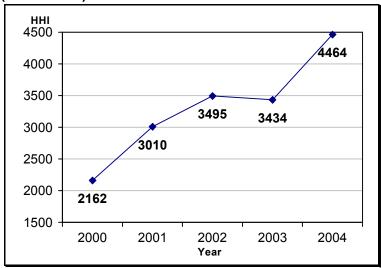

The top writers in this market are:

Transguard Insurance Company of America Inc.
The Cincinnati Insurance Company
Northland Insurance Company
Occidental Fire & Casualty Company Of NC
Progressive Premier Insurance Co of Illinois
Lincoln General Insurance Company
West Bend Mutual Insurance Co
Canal Insurance Company
Country Mutual Insurance Company
Acuity a Mutual Insurance Company

Medical Malpractice HHI

Figure 13 provides a graph of the HHI for Illinois medical malpractice coverage from 2000 through 2004. As is the case for most other states, the largest writer in Illinois of medical malpractice coverage is a physician-affiliated exchange. In Illinois, that provider is the ISMIE Mutual Insurance Company, which wrote 65.9 percent of the medical malpractice coverage in 2004. The second largest medical malpractice insurer, by direct written premium, was American Physicians Assurance Corp., which wrote only 8.7 percent of the business. As the chart shows, the market is highly concentrated, with an HHI well above the 1800 level.

Figure 13 Illinois Market Concentration - Medical Malpractice (2000-2004)

While the HHI index was at 4464, Illinois does have companies providing coverage, although expensive, to the medical profession.

Figures 14 and **15** show the top ten Illinois medical malpractice writers and their market shares for 2004 and 2003.

Figure 14

Chicago Insurance Co	\$7,660	\$7,443	1.2%	183.7%	15.4%	15.7%	1.0%

Losses incurred, defense and cost containment expenses incurred and taxes, licenses and fees are shown as a percent of earned premium. Commission and brokerage expenses are shown as a percent of written premium.

The top ten Illinois medical malpractice writers (surgical/non-surgical classes only) and their market shares for 2004 are:

ISMIE Mutual Insurance Company	72.3%
American Physicians Assurance Corp	9.3%
Medical Alliance Insurance Co	4.3%
Pronational Insurance Co	3.7%
The Medical Protective Co	3.3%
The Doctors' Company	1.3%
Professional Liability Ins Co of America	1.2%
Physicians Insurance Co of WI Inc	1.1%
National Union Fire Ins Co of Pittsburgh	0.7%
NCMIC Insurance Company	0.6%
Total	97.8%

Note: The differences between the market shares shown in this table and that mentioned on the previous page is due to the fact that the market share on the previous page is based on the total medical malpractice premiums written in the Illinois, whereas the above percentages are based on the surgical/non-surgical classes only – MDs, ODs and Dentists.)

There were 37 admitted carriers who reported the medical malpractice classes that the Department collects, one less than in 2003. Further, only eight companies had greater than 1% of the market as opposed to six companies in 2003. Also, the top two insurers lost 3.2% of the market share based upon premiums written.

This report breaks down medical malpractice liability into four different class groups. The first two groups, medical non-surgery and physicians, surgeons and dentists – not otherwise classified, represent the majority of medical malpractice business reported. The two other covered groups are dentists and oral surgery and medical-surgery. Under 215 ILCS 5/155.18,

every company writing medical malpractice insurance shall file rates and rating schedules with the Director at least annually and when ever there is a change. The surplus lines market accounted for \$24.7 million of medical malpractice premium for classes comparable to the four reported groups, a \$10.6 million increase.

The top ten writers in the medical non-surgery market are:

ISMIE Mutual Insurance Company
Medical Alliance Insurance Company
American Physicians Assurance Corp.
Pronational Insurance Company
The Medical Protective Company
Professional Liability Insurance Co. of America
NCMIC Insurance Company
Professional Solutions Insurance Company
The Doctors' Company
St. Paul Fire & Marine Insurance Company

Here again we had three new companies making it into the top ten replacing Interstate Fire & Casualty Co., Markel Insurance Co. and OHIC Insurance Co.

The top ten writers in the physicians, surgeons, and dentists – not otherwise classified market are:

ISMIE Mutual Insurance Company
American Physicians Assurance Corporation
Pronational Insurance Company
Medical Protective Company The
Physicians Insurance Company of WI Inc.
Medical Alliance Insurance Co
The Doctors' Company
National Union Fire Insurance Co Of Pitt
NCMIC Insurance Company
Professional Solutions Insurance Co

This group of companies also experienced change. Chicago Insurance Co., Continental Casualty and Cincinnati Insurance Co. were replaced by Medical Alliance Insurance Co., NCMIC Insurance Co. and Professional Solutions Insurance Co.

The top five writers in the dentists and oral surgery market are:

The Medical Protective Co
OMS National Insurance Co, RRG
The American Insurance Co
Continental Casualty Co
Ace American Insurance Co

Within this group The Medical Protective Company replaced American Insurance Company as the number one writer.

The top five writers in the medical-surgery classes market are:

ISMIE Mutual Insurance Company American Physicians Assurance Corporation Medical Alliance Insurance Co Professional Liability Insurance Co of America The Medical Protective Company

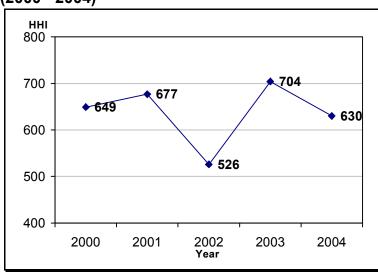

Within the top five companies writing the medical-surgery classes Medical Alliance Insurance Co. and Professional Liability Ins. Co. of American replaced Pronational Insurance Co. and The Doctors' Company.

Other Liability HHI

Figure 16 provides a graph of the HHI for Illinois other liability insurance from 2000 through 2004. The figure indicates that the market for other liability insurance in Illinois continues to be very competitive.

Figure 16

Figures 17 and **18** show the top ten Illinois other liability writers and their market shares for 2004 and 2003.

Losses incurred, defense and cost containment expenses incurred and taxes, licenses and fees are shown as a percent of earned premium. Commission and brokerage expenses are shown as a percent of written premium.

The top ten Illinois other liability writers and their market shares for 2004 are:

Underwriters at Lloyds London	23.7%
Continental Casualty Company	15.1%
Illinois State Bar Assoc Mutual Ins Co	15.0%
Illinois Casualty Company	6.2%
Chicago Insurance Company	5.5%

Executive Risk Indemnity Inc	4.7%
Great American Insurance Co	3.7%
Interstate Fire & Casualty Co	3.4%
American Guarantee & Liability Ins Co	2.7%
General Star National Insurance Co	2.6%
Total	82.6%

In addition to the top ten writers for the entire other liability line, this section also contains information for four specific classes that were mentioned in the Cost Containment Act: liquor liability, lawyers' professional liability, day-care liability, and home day-care liability.

In 2004, as in 2003, 2002 and 2001, the five same companies wrote more than \$1 million in premium in the liquor liability market. In 2000, four companies reported premium in excess of \$1 million. In 1999 there were seven. However, even with these changes the Department has detected no drastic price increases or availability issues. In 2004, the surplus lines market wrote 13 policies of liquor liability insurance. The average premium for these 13 policies was \$2,634. The liquor liability market in Illinois appears to be strong, viable and competitive.

The top 5 writers in the liquor liability market are:

Illinois Casualty Company Underwriters at Lloyds London Continental Casualty Company Springfield Fire and Casualty Company Constitutional Casualty Company

In 2004, Underwriters at Lloyds London was the top writer of lawyers' professional liability insurance, writing in excess of \$19.3 million of direct written premium. The Illinois State Bar wrote approximately \$15.3 million and Continental Casualty Company followed with premium in excess of \$13.4 million. The next nine companies each wrote in excess of \$1 million in premium. Further the premiums increased sharply. In 2004, the surplus lines market wrote only 122 policies and \$5,823,034 in premium. There were 15 policies more than in 2003. The lawyers professional liability market is dominated by a few companies and is one of the markets watched closely by the Department.

The top 10 writers of lawyers' professional liability insurance are:

Underwriters at Lloyds London
Illinois State Bar Assoc Mutual Ins Co
Continental Casualty Company
Chicago Insurance Company
Executive Risk Indemnity Inc
Great American Insurance Co
Interstate Fire & Casualty Co
American Guarantee & Liability Ins Co
General Star National Insurance Co

Medmarc Casualty Insurance Co

In 2004, fifty one admitted insurers reported day-care liability data for Illinois. This is 3 more than in 2003. The surplus lines market wrote 295 policies and just over \$486 thousand in day-care liability premium during 2004. This was 32 less policies from the surplus lines market than in 2003.

The top four admitted writers of day-care liability insurance are:

West Bend Mutual Insurance Company Philadelphia Indemnity Insurance Company Capitol Indemnity Corporation Riverport Insurance Company

In 2004, twenty two admitted insurers of home day-care liability reported data for Illinois.

The top five admitted writers of home day-care liability insurance are:

State Farm Fire & Casualty Company Country Mutual Insurance Company Allstate Insurance Company Allstate Indemnity Company Shelter Mutual Insurance Company

Market Shares of Residual Market Mechanisms

States establish residual market mechanisms to provide coverage for consumers who are unable to buy coverage in the voluntary market. If a marketplace does not function well, there will be an inordinate number of consumers in residual market programs. This is because insurers will tighten their underwriting standards, charge prices that are higher than what consumers can get in the residual market program, or stop writing business altogether in states where market problems persist.

Illinois residual market mechanisms provide essential insurance coverage for the hard-to-place risk, at rate levels approved by the Division. Illinois has residual market mechanisms for three lines of insurance: property, automobile, and workers' compensation.

Property - The Illinois FAIR Plan Association (FAIR Plan)

Fire and homeowners' insurance are placed directly through the FAIR Plan. Both dwelling and commercial insurance are available. Insurance companies share in the FAIR Plan's profits and losses in proportion to their voluntary market shares.

In Illinois, property insurance is widely available in the voluntary marketplace and only a very small percentage of consumers obtained coverage through the FAIR Plan. In addition, Illinois

consumers are not at a coverage disadvantage when they buy insurance from the FAIR Plan, as is the case in many other states. In these other states, property residual market programs offer only dwelling fire or basic homeowners' policies. Illinois has one of the most progressive FAIR Plans in the nation. Through the FAIR Plan, Illinois consumers can buy virtually the same coverages that are available in the voluntary marketplace, including guaranteed replacement cost, sewer back-up, earthquake, and building ordinance and law endorsements.

Figure 19 shows the amount of dwelling and homeowners' written premium that the FAIR Plan made up as a percent of all dwelling and homeowners' premium written in Illinois from 2000 through 2004.

Figure 19

Written Premiums for Illinois FAIR Plan (2000-2004)

	Amount of	As % of Total
	Written Premiums	Written Premiums
2000	\$4,739,000	0.22%
2001	\$4,962,000	0.20%
2002	\$7,104,000	0.20%
2003	\$9,800,000	0.49%
2004	\$11,030,119	0.52%

Source: Premium amounts provided by Illinois FAIR Plan

Automobile - The Illinois Automobile Insurance Plan (Auto Plan)

Private passenger automobile risks are assigned to private passenger automobile insurers on a rotational basis in proportion to their voluntary market shares. Assignments stay with the company and are not shared with other writers. Commercial automobile risks are placed through servicing companies. Losses are divided among the voluntary writers of commercial automobile insurance in proportion to their share of the voluntary business.

Figure 20 shows the 1999 through 2003 market shares for the Illinois Automobile Insurance Plan compared to nationwide data. The percent of written car-years is derived by dividing the number of written car-years insured through the residual market by the total number of written car-years insured through the voluntary market. Note that Illinois has had a much smaller percentage of automobiles in the residual market than the nationwide composite.

In addition, the percent of insured automobiles in the Illinois Automobile Insurance Plan remained at three tenths of a percent of the total market from 1999 through 2001 and has gradually increased since then. This figure reinforces the fact that automobile insurance in Illinois is extremely competitive in the voluntary market.

Figure 20
Percent of Automobiles in Illinois Assigned Risk Plan and the United States Composite Automobile Residual Market (1999-2003)

	1999	2000	2001	2002	2003
Illinois	0.03%	0.03%	0.03%	0.05%	0.06%
Nationwide	1.52%	1.42%	0.43%	0.52%	0.54%

Source: AIPSO Facts 2003 (based on liability car-years). 2004 data is not available at this time.

Workers' Compensation - The Illinois Workers' Compensation Assigned Risk Pool (Pool)

Several insurers act as servicing carriers for the Illinois Workers' Compensation Assigned Risk Pool. Losses are divided among the voluntary writers of workers' compensation in proportion to their shares of the voluntary business.

Figure 21 shows the percent of Illinois workers' compensation premiums written through the Pool from 2000 through 2004. The chart shows the amount of business being written in the residual market. During 2004, only 6.7 percent of Illinois direct premiums written for workers' compensation were written through the Pool.

The numbers illustrated in Figure 21 are from the NCCI and may not reconcile with numbers found in previous reports.

Figure 21 Percent of Illinois Workers' Compensation Written Through the Pool (2001-2004)

	2001	2002	2003	2004
Percent of Total	4.2	6.8	8.6	6.7

Source: National Council on Compensation Insurance (NCCI)

Each insurer participating in the Pool that removes an employer is eligible for a take-out credit. **Figure 22** shows the Illinois take-out credit results for the pool for 2004. Last year, the NCCI changed the method of reporting. The system has been automated and both the accuracy and volume of company submissions have been greatly improved.

Participation in Alternative Risk Transfer Mechanisms

Traditionally, the level of participation in alternative markets is an indicator of how well the admitted market is doing at providing coverage at prices consumers perceive to be reasonable. Therefore, if we are to assess the insurance marketplace in terms of availability, we must look at the level of activity in these alternative markets.

One problem with the non-admitted market is that there are few means by which it can be monitored. Because of the Division's limited authority over many of the alternative mechanisms, the number of risks placed and the amount of premium written cannot be assessed and a complete picture of this aspect of the insurance marketplace is unattainable. This problem has become more prevalent as the size of the transfer of risk alternative markets continues to grow.

Surplus lines refers to insurance written by a non-admitted (unlicensed) insurer through a licensed surplus lines producer. The licensed producer must exercise due diligence in protecting the insured since the Division has no jurisdiction over unlicensed companies and the Illinois Insurance Guaranty Fund provides no protection for the consumer. Thus, it is the producer and not the Division who must determine the company's financial stability and standards of management prior to submitting the risk.

Figure 25 shows the number of policies written in Illinois from 2000 to 2004 through surplus lines producers for homeowners', private passenger auto liability and physical damage, commercial auto liability, medical malpractice and general liability coverage. Of the 752 policies for medical malpractice, 352 are specifically for doctors and dentists. (The term "general"

liability" used in this section equates closely to the term "other liability" used in other areas of this report).

Figure 25
Surplus Lines - Number of primary and excess policies written in Illinois (2000 - 2004)

Line of Business	2000 Illinois Policy Count	2001 Illinois Policy Count	2002 Illinois Policy Count	2003 Illinois Policy Count	2004 Illinois Policy Count
Homeowners'	1,955	1,126	1,181	1,340	860

INEX (previously the Illinois Insurance Exchange) provides a market for direct insurance and reinsurance. It is comprised of syndicates which underwrite and insure risks, and brokers who are authorized to place business with those syndicates. Fashioned after Lloyd's of London, INEX serves as a facilitator, record keeper and regulator for the operations of its members. INEX submits an annual financial statement to the Division reflecting both its combined financial position and the financial position of each individual syndicate.

Insurance Pools are groups that join together for the purpose of sharing certain risks on an agreed-upon basis. Participants may consolidate their risk exposures without being subject to the same regulatory requirements as admitted insurers. Pools organized under the following Acts are allowed in Illinois:

The Workers' Compensation Act allows entities that are members of a trade association, or that have similar risk characteristics, to form a risk-sharing pool. Each pool must submit annual financial statements, CPA audit reports, and actuarial opinions to the Division and are subject to examination by the Director.

The Religious and Charitable Risk Pooling Trust Act permits entities having an IRS 501c(3) exemption (a non-profit entity), or hospitals owned and operated by a unit of local government, to form a trust to pool their risks. These trust funds can only operate with prior approval of the Director of Insurance. The trusts must make annual CPA audit reports to the Division and are subject to examination by the Director.

The Intergovernmental Cooperation Act enables units of local government to enter into a pooling arrangement with other similar entities for the purpose of risk sharing. These pooling arrangements are not regulated by the Division, however, they must register with the Division and file annual audited financial statements.

Risk Retention and Purchasing Groups are allowed under the Federal Liability Risk Retention Act of 1986. This Act eliminated barriers to group self-insurance programs by allowing them to buy group liability insurance. At the end of year 2004, there were 79 foreign registered risk retention companies, only one Illinois domiciled risk retention companies, and 413 risk purchasing groups.

Captive Insurance Companies may be formed by a company to insure its own risks and exposures, by an association to insure its member organizations, or by industrial insured groups. Illinois captives are regulated by the Division, are required to file certain financial information with the Division, and are subject to examination by the Director.

Self-insurance occurs when individuals or businesses retain their own risks. Entities that self-insure are under no obligation to report premiums, losses, or expenses to any statistical association or regulatory body.

Profitability

In monitoring competition in general, and price performance in particular, the Division does not examine individual insurer prices for appropriateness. To do so is virtually impossible. Instead, it monitors the effectiveness of competition, examining the pattern of profits throughout the market.

In examining profitability, the Director must balance the seemingly divergent concerns of consumers and insurers. To protect consumers, rates must not be excessive. There is a fine line between rates that are excessive and rates that are inadequate, especially since insurance policies must be priced long before the results of the pricing decisions are known.

The Division must also be concerned about the long-term viability of the insurance marketplace, including the financial viability of the companies that insure consumers.

Illinois-specific Underwriting Results Compared to Countrywide Results

For each of the coverages listed below, this section contains:

- combined underwriting results for business written in Illinois and business written countrywide;
- a five-year trend for Illinois losses as a percent of premiums earned, compared to the five-year trend for countrywide losses.

Personal Lines Insurance

Figure 26 shows the percentage change in the Consumer Price Index between 2003 and 2004 for homeowners and automobile insurance - the personal lines of insurance coverage - and the overall index.

Figure 26

Consumer Price Index for Household and Automobile Insurance

	2003	2004	% chg.
All items	184.0	188.9	2.7%
Household Insurance	114.8	116.2	1.2%
Motor Vehicle Insurance	314.4	323.2	2.8%

Source: U.S. Department of Labor. Bureau of Labor Statistics

In **Figures 27** through **30** the "countrywide" figures are the aggregate amounts for Illinois-licensed insurers' nationwide underwriting results. This data comes from the Insurance Expense Exhibit Part III.

Figure 27 shows a comparison of the underwriting results of homeowners insurance written in Illinois with that written nationwide during 2004. As Figure 27 shows, incurred losses in Illinois for the year were much lower than the nationwide loss ratio, while defense and cost containment expenses incurred were also less than the nationwide figure.

Figure 27

Homeowners' Underwriting Results (2004)

Homeowners (\$000 omitted)	Illinois*	Countrywide**
Direct written premiums	2,176,115	39,700,120
Direct earned premiums	2,093,634	37,838,389
Expenses (% earned premium)		
Incurred losses	45.4%	62.3%
Def. & cost cont. exp. incurred	1.4%	1.8%
Comm./brokerage	14.5%	14.4%
Taxes, licenses & fees	2.0%	2.6%

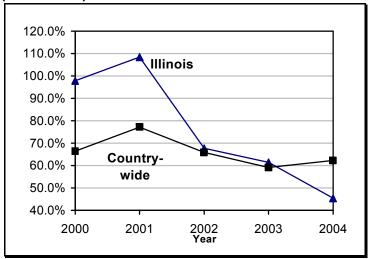

^{*}Source: NAIC State Data Network, 2004 Illinois State Page Exhibit.

Figure 28 compares the five-year trend for loss percentages in Illinois and countrywide in the homeowners line of business. As the chart shows, homeowners losses in Illinois, as a percent of earned premium, dropped below nationwide losses during 2004.

Figure 28

Private Passenger Automobile

Figure 29 compares the underwriting results of private passenger automobile insurance written in Illinois with that written countrywide during 2004. Losses incurred in the private passenger automobile line of business were slightly better than nationwide losses.

Figure 29

Private Passenger Auto Underwriting Results (2004)

Private Passenger Auto (\$000 omitted)	Illinois*	Countrywide**
Direct written premiums	5,727,788	117,997,137
Direct earned premiums	5,733,714	117,224,060
Expenses (% earned premium)		
Incurred losses	57.2%	59.0%
Def. & cost cont. exp. incurred	3.3%	2.7%
Comm./brokerage	10.7%	8.9%
Taxes, licenses & fees	1.4%	2.1%

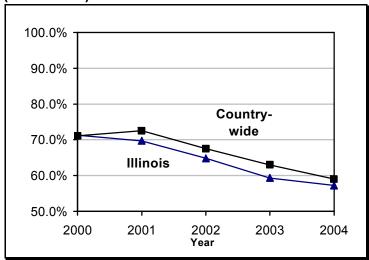

^{*}Source: NAIC State Data Network, 2004 Illinois State Page Exhibit.

Figure 30 shows the five-year trend for loss percentages in the private passenger automobile line for Illinois and countrywide. As the chart shows, the Illinois private passenger automobile loss percentages have trended close to countrywide loss percentages over the past five years.

^{**}Source: NAIC State Data Network 2004 Insurance Expense Exhibit Part III Illinois-licensed insurers.

Figure 30

Commercial Automobile Liability

Figure 31 shows the underwriting results in the commercial automobile liability line during 2004 were similar to those countrywide.

Figure 31

Commercial Automobile Liability Underwriting Results (2004)

Commercial Auto Liability		
(\$000 omitted)	Illinois*	Countrywide**
Direct written premiums	865,014	16,896,936
Direct earned premiums	901,728	16,650,393
Expenses (% earned premium)		
Incurred losses	56.0%	56.9%
Def. & cost cont. exp. incurred	6.8%	6.3%
Comm./brokerage	13.7%	13.9%
Taxes, licenses & fees	2.1%	2.7%

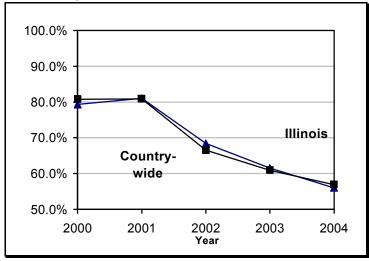

^{*}Source: NAIC State Data Network, 2004 Illinois State Page Exhibit.

Figure 32 compares the five-year trend for loss percentage for Illinois and countrywide commercial automobile liability. The trend over the past five years in loss percentages in Illinois has been very similar to losses countrywide.

^{**}Source: NAIC State Data Network 2004 Insurance Expense Exhibit Part III Illinois-licensed insurers.

Figure 32

Commercial Auto Liability Losses as a % of Premiums Earned (2000-2004)

Medical Malpractice

Figure 33 shows the underwriting results for the medical malpractice market in Illinois and countrywide for 2004. Although medical malpractice losses in Illinois remained greater than losses countrywide, the loss ratio continues to improve.

Figure 33

Medical Malpractice Underwriting Results (2004)

าดเร*	Countrywide**
7,643	5,426,995
0,132	5,414,218
8.6%	57.5%
2.7%	26.0%
6.2%	7.5%
1.2%	1.8%
	8.6% 2.7% 6.2%

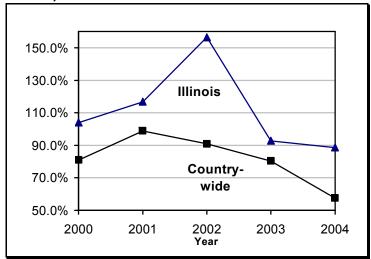

^{*}Source: NAIC State Data Network, 2004 Illinois State Page Exhibit

Figure 34 compares the five-year loss percentages trend for Illinois and countrywide medical malpractice insurance. After soaring to over 150% of earned premium in 2002, losses in Illinois dropped to below 90 percent, but still trail nationwide losses by approximately 31%.

^{**}Source: NAIC State Data Network 2004 Insurance Expense Exhibit Part III, Illinois-licensed insurers.

Figure 34

Medical Malpractice Losses as a % of Premiums Earned (2000-2004)

Other Liability

Figure 35 compares the underwriting results between Illinois and countrywide for the other liability line of business.

Figure 35

General Liability Underwriting Results (2004)

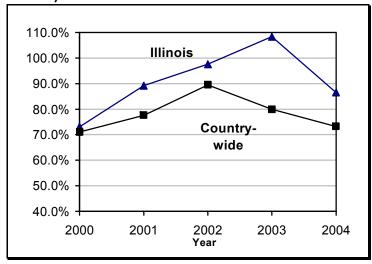

Other Liability (\$000 omitted)	Illinois*	Countrywide**
Direct written premiums	3,215,190	30,289214
Direct earned premiums	3,255,960	29,600840
Expenses (% earned premium)		
Incurred losses	86.5%	73.2%
Def. & cost cont. exp. incurred	13.3%	17.6%
Comm./brokerage	7.3%	13.7%
Taxes, licenses & fees	2.3%	2.3%

^{*}Source: NAIC State Data Network, 2004 Illinois State Page Exhibit

Figure 36 compares the five-year trend for loss percentages for Illinois and countrywide for other liability insurance. While losses in Illinois increased steadily between 2000 and 2003, last year saw a significant decline, bringing them closer to the nationwide level.

^{**}Source: NAIC State Data Network 2004 Insurance Expense Exhibit Part III, Illinois-licensed insurers.

Figure 36
Other Liability Losses as a % of Premiums Earned (2000-2004)

Workers Compensation

In order to slow the growth in workers' compensation claims costs during the last part of the 1980's, many states passed new laws that made it easier to manage medical costs and oversee the treatment plan and the return-to-work process. Larger deductibles, which made employers more concerned about safety, along with better fraud prevention also helped hold claim costs down.

However, from 1997 to 2000, workers' compensation losses rose dramatically before retreating in 2001. Liberty Mutual conducted a study that found that rising claim costs had been driven by a widening definition of workplace injuries, more expensive medical treatments and a growing number of visits to medical practitioners. But while claim costs had risen, the number or frequency of claims has been declining, 38% since 1990.

On 20 July 2005 the Governor signed into law HB2137. Public Act 94-0277 revamped the Workers' Compensation Law in Illinois. The new law provides increased benefits (the first increase in these benefits in years), set standards for payments for accidental injuries and medical expenses, creates a Workers' Compensation Medical Fee Advisory Board, requires utilization review programs for workers' compensation services, and requires the Division of Insurance to establish a fraud and insurance non-compliance unit to investigate workers' compensation fraud. Among the other changes made were changes to the Illinois Workers' Compensation Commission, changes to the procedures in contested cases, and others.

.

¹ Insurance Information Institute.

Figure 37 shows a comparison of the underwriting results in 2004 in the workers compensation line of business between Illinois and the nation.

Figure 37

Workers Compensation Underwriting Results (2004)

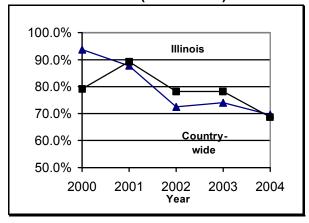

Workers Compensation (\$000 omitted)	Illinois*	Countrywide**			
Direct written premiums	2,436,090	28,500,132			
Direct earned premiums	2,394,821	28,310,612			
Expenses (% earned premium)					
Incurred losses	69.6%	68.7%			
Def. & cost cont. exp. incurred	6.6%	7.2%			
Comm./brokerage	8.1%	8.0%			
Taxes, licenses & fees	2.9%	4.3%			

^{*}Source: NAIC State Data Network, 2004 Illinois State Page Exhibit

Figure 38 shows workers' compensation losses as a percent of earned premium for the years 2000 through 2004. As mentioned previously, since peaking in 2000 to above 90% of earned premium, workers compensation losses have declined almost 20 points by 2002 and have continued to trend downward since.

Figure38

Workers' Compensation Losses as a % of Premiums Earned (2000-2004)

Reliability

In determining whether the overall marketplace is viable, the Division must consider:

- Profitability.
- Financial Solvency Regulation.

^{**}Source: NAIC State Data Network 2004 Insurance Expense Exhibit Part III, Illinois-licensed insurers.

Businesses that provide a financial service must be financially sound. An insurance contract has little value to the insured if there is no guarantee that the insurance company will have the money to pay claims when needed.

As discussed earlier, the Division must balance the seemingly divergent concerns of consumers and insurers. While we must ensure that consumers are able to buy insurance at a reasonable price, we must also ensure the overall viability of the marketplace.

One measure of a company's financial performance is its profitability. It must generate enough profit to survive and succeed. In a given month, if expenses exceed income, they must be paid from the reserve fund. If the trend continues, reserve funds run out causing the business to collapse. Therefore, it is imperative that insurance companies manage income and expenses to assure profitability and survival.

A company that can offer insurance coverage at competitive prices and reap adequate profits as an ongoing concern is considered to be financially viable. When the majority of insurers in the market are competitive and profitable, the market is considered to be financially strong.

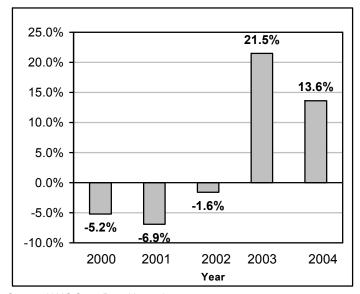

Profitability

Change in Policyholders Surplus

One measure of overall profitability is the change in policyholders' surplus from one year to the next. Policyholders' surplus is made up of: 1) underwriting gains or losses; 2) investment gains or losses; and 3) net contributed capital and other surplus changes.

Figure 39 shows the percent change in policyholders' surplus for the Illinois-licensed property/casualty industry as a whole over the past five years. After three consecutive years of negative growth, the industry's surplus increased the last two years.

Figure 39
Percent Change in Policyholders' Surplus (2000-2004)

Source: NAIC State Data Network

Figure 40 shows income from investments, net income, unrealized capital gains/losses and policyholders' surplus from 2000 to 2004. The property/casualty industry has experienced significant increases in net income and unrealized capital gains since 2002.

Figure 40
Net Investment Income Earned, Net Income, Unrealized Capital
Gains/Losses and Policyholders' Surplus 2000-2004 (in millions)

	2000	2001	2002	2003	2004
Net Investment gain	\$51,060	\$51,573	\$39,995	\$40,893	\$44,952
Net Income	21,231	(3,971)	11,485	27,199	36,488
Unrealized Capital Gains/Losses	(20,077)	(19,755)	(26,485)	30,624	17,189
Policyholders' Surplus	312,966	299,868	295,137	365,589	408,140

Source: NAIC State Data Network

Underwriting Gains/Losses

Figure 41 shows the aggregate underwriting gain/loss for Illinois-licensed insurers from 2000-2004. The industry experienced an underwriting gain in 2004. Earned premium increased 6 percent from 2003 to 2004, while losses and loss expenses increased by 3.4 percent.

Figure 41
Aggregate Net Underwriting Gain/(Loss) (in millions) (2000-2004)

,					
	2000	2001	2002	2003	2004
Premiums earned	\$243,787	\$260,142	\$290,397	\$325,159	\$344,724
Losses incurred	166,963	197,360	198,964	200,092	206,102
Loss expenses incurred	30,939	33,844	36,981	41,892	44,217
Other underwriting expenses incurred	69,109	72,730	79,362	85,604	88,666
Dividends to policyholders	<u>2,371</u>	<u>1,203</u>	<u>1,121</u>	<u>1,197</u>	<u>978</u>
Net underwriting gain/loss	<u>(\$25,595)</u>	<u>(\$44,995)</u>	<u>(\$26,031)</u>	<u>(\$3,626)</u>	<u>4,761</u>

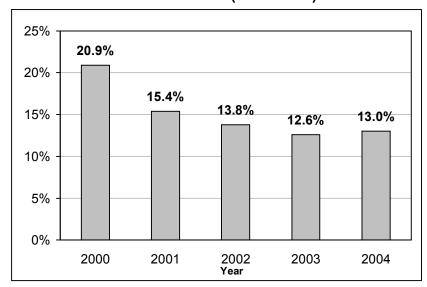

Source: NAIC State Data Network

Net Investment Income Ratio

One component of surplus is income derived from investments. The net investment income ratio measures income from invested assets relative to earned premiums. It is calculated by dividing net investment income (income from invested assets less investment expenses and depreciation on real estate) by earned premium.

Figure 42 shows the net investment income ratio for Illinois-licensed property/casualty insurers during the most recent five-year period. This ratio shows the investment income component of overall profitability.

Figure 42
Net Investment Income Ratio (2000-2004)

Source: NAIC State Data Network

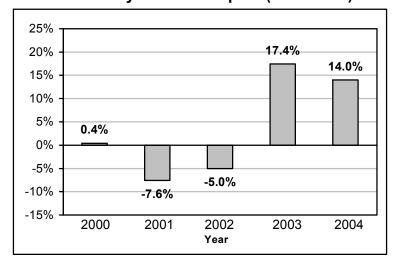

Return on Policyholders' Surplus

Another measure of overall profitability is the return on policyholders' surplus. It is the sum of net income after dividends and taxes and unrealized capital gains divided by the average of the current year and prior year's policyholders' surplus.

Figure 43 shows the aggregate return on policyholders' surplus from 2000 through 2004 for the Illinois-licensed property/casualty industry combined. After three years of declining returns, two of which were negative, the industry was able to produce a 17.4 percent return on policyholder surplus in 2003 and a return of 14 percent for 2004.

Figure 43

Return on Policyholders' Surplus (2000-2004)

Source: NAIC State Data Network

Financial Solvency Regulation

Although the Division cannot guarantee that Illinois-licensed insurers are profitable, we monitor the financial solvency and strength of Illinois-licensed insurers in several ways including:

- maintaining a staff of trained accountants and specialists who identify companies developing financial difficulties so that the Division can step in to minimize potential losses to Illinois policyholders;
- working closely with insurance companies with identified financial difficulties to minimize
 potential risk to policyholders while attempting to resolve manageable problems or determine
 the need for rehabilitation or liquidation;
- employing field examiners for on-site evaluation of insurance company financial records;
- reviewing operations and compliance issues through scheduled, targeted, and special exams of known or suspected problems;
- maintaining a staff of actuaries who monitor the adequacy of loss reserves, cash flow testing, and proper valuation of assets;
- licensing and registering the many types of insurers, surplus lines producers, and risk sharing pools authorized by the Illinois Insurance Code and related Acts;
- investigating unauthorized organizations or individuals thought to be conducting illegal insurance operations and taking regulatory action to remove them from the market to protect consumers from fraudulent activities
