Appendix E: Consolidated Insurance Expenses Exhibit Part III of Illinois-licensed Property/Casualty Insurers for 2005.	

Purpose of This Report

The Division of Insurance is required by statute to submit an Annual Report to the Illinois General Assembly on Insurance Cost Containment by April 15th of each year containing an analysis of sections of the Illinois insurance market and a recommendation of the most appropriate and comprehensive cost containment system for the state.

The law was enacted in 1986 in response to the public's growing concern about the availability and affordability of property and liability insurance. The law mandated that a uniform system be created for the collection, analysis and distribution of insurance cost data. Its expressed intent was to permit and encourage competition among companies on a sound financial basis to the fullest extent possible and to establish a mechanism to ensure the provision of adequate insurance at reasonable rates to the citizens of Illinois.

DIRECT PREMIUMS WRITTEN AND LOSS RATIOS BY STATE

Figure 1 shows a breakdown of total direct premium written (DPW) and losses incurred for the property/casualty industry by state from 2001 through 2005.

Direct written premium in Illinois totaled \$20.8 billion in 2005, representing 4.2 percent of total written premium nationwide. Property/casualty losses in Illinois were 56.5 percent of direct earned premium in 2005, a decrease of 5.6 percent from the previous year and the lowest loss ratio in the past five years.

*The "other" region includes American Samoa and Guam, Puerto Rico and the U.S. Virgin Islands and Canada.

The Southwest Central and Southeast Central regions both experienced loss ratios above 100 percent during 2005 as a result of both Hurricanes Katrina and Rita. Hurricane Katrina made landfall twice, first on August 25 in Florida as a Category 1 hurricane with 80 mph winds and then on August 29 on the northern Gulf shore as a Category 4 hurricane with estimated winds at 140 mph. Florida also experienced two other Category 3 hurricanes in 2005 –Hurricane Dennis on July 10 and Hurricane Wilma on October 24.

In the aftermath of the 2004 and 2005 hurricane seasons, homeowners insurance rates along the Gulf coast and in the Southeast have skyrocketed. Many homeowners whose homes are paid for are opting not to carry coverage, but those with mortgages are required to by their lenders and must buy coverage at whatever price they can get. Florida, Texas and Louisiana offer state-run insurance programs to coastal residents, but the coverage is limited and expensive. Many homeowners are electing to increase their deductibles for a slightly lower premium. Florida’s state-run program has grown so large it is close to becoming the largest insurer of homes in the state.

Figure 3 illustrates the distribution of property/casualty premium written by line of business during 2005 in Illinois. As the chart shows, personal-lines insurance (homeowners and private passenger automobile) makes up the largest portion of the property/casualty market. Private passenger automobile (28.4 percent), including both the liability and physical damage component, is the single largest line of insurance. Cost Containment data are reported to the Division pursuant to Illinois Administrative Code Title 50, Chapter I, Subchapter iii, Part 4203 – “The Cost Containment Data and Reporting Requirements” for the following lines of business: private passenger automobile (liability and physical damage separately), homeowners (including residential fire), commercial automobile liability, and specified insurance classes from the medical malpractice and other liability lines.

Figure 3
Percent by Line of All Property/Casualty Premiums Written in Illinois (2005)

ANALYSIS OF THE MARKETPLACE

From both a consumer's and a regulator's standpoint, insurance regulation should provide an environment where:

- Coverage is available.
- Coverage is offered at a reasonable price.
- Coverage is available from reliable insurers.

The Cost Containment Act requires the Division to analyze the property and casualty marketplace each year and to recommend changes that may be needed to correct market problems.

The Division measures the overall competition of the Illinois marketplace by looking at three elements: availability, profitability, and reliability.

Availability

The Division measures availability in three ways:

1. Herfindahl/Hirschman Index (HHI) and Market Shares by Line.
2. Market Shares of Residual Market Mechanisms.
3. Participation in Alternative Risk Transfer Mechanisms.

Herfindahl/Hirschmann Index (HHI) and Market Shares by Line

The Cost Containment Act requires the Division to collect and analyze data in five major lines of business: homeowners', private passenger automobile, commercial automobile liability, medical malpractice, and other liability. This report contains a comparison of underwriting results for Illinois versus nationwide for these five lines of business and an analysis of market concentration and market share in the State of Illinois. Market concentration is determined using an economic measure known as the Herfindahl/Hirschmann Index (HHI). The HHI is the summation of the squares of each company's market share. Generally, an HHI of 1800 or above is an indication that the market may be too highly concentrated and may be approaching anti-competitive behavior.

Homeowners HHI

Figure 4 provides a graph of the HHI for Illinois homeowners' insurance from 2001 through 2005. After reaching a five-year high of 1320 in 2002, the HHI for homeowners insurance has dropped down to 1290 for calendar-year 2005.

Figure 4

Illinois Market Concentration - Homeowners (2001-2005)

The top ten Illinois homeowners' writers (including residential fire) and their market shares for 2005 and 2004 are shown in Figures 5 and 6.

Losses incurred, defense and cost containment expenses incurred and taxes, licenses and fees are shown as a percent of earned premium. Commission and brokerage expenses are shown as a percent of written premium.

The top ten Illinois homeowners' writers (including residential fire) and their market shares for 2005 are:

State Farm Fire & Casualty Company	30.2%
Allstate Indemnity Company	7.8%
Country Mutual Insurance Company	7.5%
Allstate Insurance Company	7.5%
Illinois Farmers Insurance Company	5.9%
American Family Mutual Insurance Company	5.7%
Economy Premier Assurance Company	1.7%
Travelers Personal Insurance Company	1.5%
Liberty Mutual Fire Insurance Company	1.4%
The Farmers Automobile Insurance Association	1.3%
Percent of Total Market	70.5%

Homeowners' data are collected pursuant to Cost Containment Data and Reporting Requirements (Part 4203, subpart A). Again this year, cost containment data for homeowners' are summarized for the entire State of Illinois, the City of Chicago, and downstate Illinois. State Farm Fire & Casualty Company continues to rank first in all three categories. Most insurers that write in downstate Illinois also have a presence in the City of Chicago. There were 172 insurers reporting homeowners' business throughout the state and 142 companies reporting direct written premium in the City of Chicago. This business represents homeowners' multi-peril coverage written in HO-1, HO-2, HO-3, HO-5 and HO-8 policies.

On a statewide basis State Farm Fire & Casualty Company ranked first in condominium and renters insurance followed by Allstate Indemnity Company, Allstate Insurance Company and American Family Mutual Insurance Company. There were 134 other companies also writing this coverage in Illinois.

State Farm Fire & Casualty Company wrote the largest amount of mobile home coverage followed by Progressive Casualty Insurance Company, Country Mutual Insurance Company, American Family Mutual Insurance Company, Progressive Universal Insurance Company and Pekin Insurance Company.

The top ten writers in the entire State of Illinois homeowners' market are:

- State Farm Fire & Casualty Company
- Allstate Indemnity Company
- Allstate Insurance Company
- Country Mutual Insurance Company
- Illinois Farmers Insurance Company
- American Family Mutual Insurance Company
- Economy Premier Assurance Company
- Travelers Personal Insurance Company
- Liberty Mutual Fire Insurance Company
- Farmers Automobile Insurance Association

The top ten writers in the downstate homeowners' market are:

- State Farm Fire & Casualty Company
- Country Mutual Insurance Company
- American Family Mutual Insurance Company
- Allstate Indemnity Company
- Illinois Farmers Insurance Company
- Allstate Insurance Company
- Auto Owners Insurance Company
- Farmers Automobile Insurance Association
- Cincinnati Insurance Company
- Pekin Insurance Company

The top ten writers in the City of Chicago homeowners' market are:

- State Farm Fire & Casualty Company
- Allstate Insurance Company
- Allstate Indemnity Company
- American Family Mutual Ins Company
- Illinois Farmers Insurance Company.
- Travelers Personal Insurance Company
- Liberty Mutual Fire Insurance Company
- Economy Premier Assurance Company
- Hartford Insurance Company of Illinois
- Economy Fire & Casualty Company

Private Passenger Automobile HHI

Figure 7 provides a graph of the HHI for Illinois private passenger automobile insurance (including liability and physical damage) from 2001 through 2005. It suggests that the market for private passenger coverage has generally become more competitive since 2001.

Figure 7

Illinois Market Concentration - Private Passenger Automobile (2001-2005)

Figures 8 and 9 show the top ten Illinois private passenger automobile writers (liability and physical damage coverage combined) and their market shares for 2005 and 2004.

Figure 8

Top 10 Private Passenger Auto Insurers in Illinois – 2005

Losses incurred, defense and cost containment expenses incurred and taxes, licenses and fees are shown as a percent of earned premium. Commission and brokerage expenses are shown as a percent of written premium.

The top ten Illinois private passenger automobile writers (liability and physical damage coverage combined) and their market shares for 2005 are:

State Farm Mutual Auto Insurance Company	27.9%
Allstate Insurance Company	6.8%
Country Mutual Insurance Company	5.8%
Allstate Property & Casualty Insurance Company	5.3%
American Family Mutual Insurance Company	4.6%
Illinois Farmers Insurance Company	4.5%
Country Preferred insurance Company	2.1%
State Farm Fire & Casualty Company	2.0%
Progressive Northern Insurance Company	1.8%
GEICO General Insurance Company	1.4%
Percent of Total Market	62.2%

In the following paragraphs, only the liability component will be presented for the entire State of Illinois, the City of Chicago, and downstate Illinois. State Farm Mutual Insurance Company and Country Mutual Insurance Company rank one and two.

There were 241 insurers that filed private passenger automobile liability insurance data in accordance with the Cost Containment Data and Reporting Requirements (Part 4203). Of these, 221 insurers reported written premium in the City of Chicago. For comparison, there were 225 companies that filed data in 2004, and 243 that filed data in 2003.

The top ten writers in the entire State of Illinois private passenger automobile liability market are:

- State Farm Mutual Automobile Insurance Company
- Country Mutual Insurance Company
- Allstate Insurance Company
- Allstate Property & Casualty Company
- American Family Mutual Insurance Company
- Illinois Farmers Insurance Company
- State Farm Fire & Casualty Company
- Country Preferred Insurance Company
- Progressive Northern Insurance Company
- GEICO General Insurance Company

The top ten writers in the downstate private passenger automobile liability market are:

- State Farm Mutual Automobile Insurance Company
- Country Mutual Insurance Company
- American Family Mutual Insurance Company
- Progressive Northern Insurance Company
- Country Preferred Insurance Company
- Allstate Property & Casualty Company
- Illinois Farmers Insurance Company
- Farmers Automobile Insurance Association
- Allstate Insurance Company
- State Farm Fire & Casualty Company

The top ten writers in the City of Chicago private passenger automobile liability market are:

- State Farm Mutual Automobile Insurance Company
- Allstate Insurance Company
- Allstate Property & Casualty Insurance Company
- United Automobile Insurance Company
- American Family Mutual Insurance Company
- American Access Casualty Company
- Safeway Insurance Company
- State Farm Fire & Casualty Insurance Company
- Illinois Farmers Insurance Company
- GEICO General Insurance Company

Commercial Automobile Liability HHI

Figure 10 provides a graph of the HHI for Illinois commercial automobile liability from 2001 to 2005. The HHI suggests that the market concentration in Illinois for commercial automobile liability insurance is very low (very competitive).

Figure 10

Illinois Market Concentration - Commercial Automobile Liability (2001-2005)

Figures 11 and 12 show the top ten Illinois commercial automobile liability writers for 2005 and 2004.

Figure 11

Losses incurred, defense and cost containment expenses incurred and taxes, licenses and fees are shown as a percent of earned premium. Commission and brokerage expenses are shown as a percent of written premium.

The top ten Illinois commercial automobile liability writers for 2005 are:

Transguard Insurance Company of America Inc.	10.1%
American Country Insurance Company	5.9%
American Service Insurance Company Inc.	5.3%
Lincoln General Insurance Company	4.7%
Cincinnati Insurance Company	4.0%
Northland Insurance Company	3.9%
Progressive Premier Insurance Company of Illinois	3.5%
Occidental Fire & Casualty Company of NC	3.0%
West Bend Mutual Insurance Company	3.0%
Canal Insurance Company	2.8%
Percent of Total Market	46.2%

Pursuant to Cost Containment Data and Reporting Requirements (Part 4203), data are collected for specified classes of commercial automobile liability insurance through the Cost Containment filings. Two groups of particular interest are: taxis and public livery and other (excluding taxis and public livery).

American Country Insurance Company exhibits a large share of the taxis and public livery class of commercial automobile liability insurance. Fifty other companies compete for the remaining market share in this class, four less companies than reported in 2004. The Department carefully monitors this market due to American Country Insurance Company's significant market share in this class. American Country Insurance Company insures the two largest taxicab firms in Chicago and the State of Illinois. Because this is such a specialized market, the concentration of business is not alarming.

The top five admitted writers in this market are:

American Country Insurance Company
American Service Insurance Company Inc.
Lancer Insurance Company
Sentry Select Insurance Company
Allied Property & Casualty Company

The other classes of commercial automobile liability insurance collected represent the fleet and non-fleet combined trucks, tractors, and trailers classes in this line. These classes remain very competitive in Illinois. A total of 236 companies reported positive written premium in 2005, with 73 companies writing in excess of \$1 million in premium, a decrease of 10 companies over 2004. The surplus line market wrote 77 policies and \$2,153,641 in premium for this coverage. This represents an increase of 22 policies from 2004, however premiums decreased by almost \$0.5 million.

The top writers in this market are:

Transguard Insurance Company of America Inc.
Lincoln General Insurance Company
The Cincinnati Insurance Company
Northland Insurance Company
Progressive Premier Insurance Company of Illinois
Occidental Fire & Casualty Company of NC
West Bend Mutual Insurance Company
Canal Insurance Company
Great West Casualty Company
Country Mutual Insurance Company

Medical Malpractice HHI

Figure 13 provides a graph of the HHI for Illinois medical malpractice coverage from 2001 through 2005. As is the case for most other states, the largest writer in Illinois of medical malpractice coverage is a physician-affiliated exchange. In Illinois, that provider is the ISMIE Mutual Insurance Company, which wrote 65.8 percent of the medical malpractice coverage in 2005. The second largest medical malpractice insurer, by direct written premium, was American Physicians Assurance Corporation, which wrote only 9.0 percent of the business. As the chart shows, the market is highly concentrated, with an HHI well above the 1800 level.

Figure 13 Illinois Market Concentration - Medical Malpractice (2001-2005)

Figures 14 and 15 show the top ten Illinois medical malpractice writers and their market shares for 2005 and 2004.

Figure 14 Top 10 Medical Malpractice Insurers in Illinois – 2005

Company	Direct Written Premium (000's omitted)	Direct Earned Premium (000's omitted)	Illinois Market Share	Losses Incurred	Direct Defense & Cost Cont. Exp. Incurred	Comm. & Brokerage Expenses	Taxes, Licenses & Fees

Physicians Ins. Co. Of WI	7,464	8,803	1.2%	36.1%	44.2%	10.9%	-0.5%
Chicago Ins. Co.	6,333	6,667	1.0%	223.1%	24.4%	21.8%	0.7%

Losses incurred, defense and cost containment expenses incurred and taxes, licenses and fees are shown as a percent of earned premium. Commission and brokerage expenses are shown as a percent of written premium.

The top ten Illinois medical malpractice writers (surgical/non-surgical classes only) and their market shares for 2005 are:

ISMIE Mutual Insurance Company	71.0%
American Physicians Assurance Corporation	9.3%
Medical Alliance Insurance Company	5.6%
Pronational Insurance Company	4.1%
The Medical Protective Company	3.2%
Professional Liability Insurance Company of America	2.1%
Physicians Insurance Company of WI Inc.	0.9%
Professional Solutions Insurance Company	0.9%
The Doctors Company	0.7%
National Union Fire Insurance Company of Pittsburgh	0.5%
Total	98.3%

Note: The differences between the market shares shown in this table and that mentioned on the previous page is due to the fact that the market share on the previous page is based on the total medical malpractice premiums written in the Illinois, whereas the above percentages are based on the surgical/non-surgical classes only – MDs, ODs and Dentists.

There were 33 admitted carriers who reported the medical malpractice classes that the Department collects, four less than in 2004. Further, only six companies had greater than 1% of the market as opposed to eight companies in 2004. Also, the top insurer lost 1.3% of the market share based upon premiums written.

This report breaks down medical malpractice liability into four different class groups. The first two groups, medical non-surgery and physicians, surgeons and dentists—not otherwise classified, represent the majority of medical malpractice business reported. The two other covered groups are dentists and oral surgery and medical-surgery. Under 215 ILCS 5/155.18, every company

writing medical malpractice insurance shall file rates and rating schedules with the Director at least annually and whenever there is a change. The surplus lines market accounted for \$24.6 million of medical malpractice premium for classes comparable to the four reported groups, experiencing no change from 2004.

The top ten writers in the medical non-surgery market are:

- ISMIE Mutual Insurance Company
- Medical Alliance Insurance Company
- American Physicians Assurance Corporation
- Pronational Insurance Company
- Professional Liability Insurance Company of America
- Medical Protective Company
- Professional Solutions Insurance Company
- The Doctors' Company
- Preferred Professional Insurance Company
- Medical Liability Alliance

We had two new companies making it into the top ten replacing NCMIC Insurance Company and St. Paul Fire & Marine Insurance Company.

The top ten writers in the physicians, surgeons, and dentists – not otherwise classified market are:

- ISMIE Mutual Insurance Company
- American Physicians Assurance Company p.
- Pronational Insurance Company
- The Medical Protective Company
- Medical Alliance Insurance Company
- Physicians Insurance Company of WI Inc.
- National Union Fire Insurance Company of Pittsburgh
- Professional Solutions Insurance Company
- The Doctors' Company
- Professional Liability Insurance Company of America

This group of companies also experienced change. NCMIC Insurance Company was replaced by Professional Liability Insurance Company of America.

The top five writers in the dentists and oral surgery market are:

- American Insurance Company
- The Medical Protective Company
- OMS National Insurance Company, RRG
- Continental Casualty Company
- Truck Insurance Exchange

Within this group American Insurance Company replaced Medical Protective Company as the number one writer.

The top five writers in the medical-surgery classes market are:

- ISMIE Mutual Insurance Company
- Medical Alliance Insurance Company
- American Physicians Assurance Corporation
- Professional Liability Insurance Company of America
- The Medical Protective Company

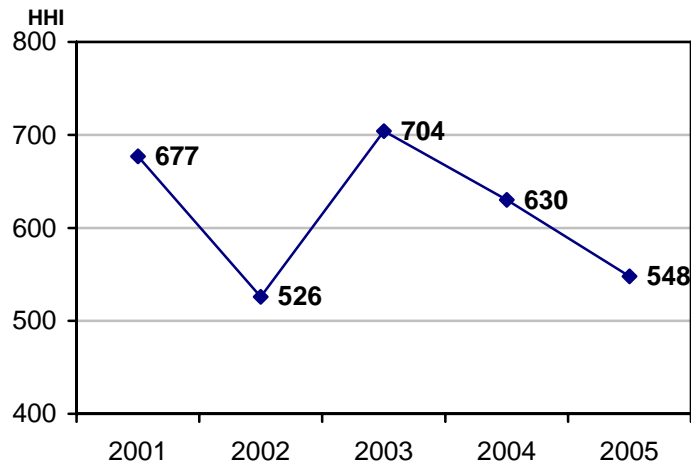

Within the top five companies writing the medical-surgery classes only one company increased market share.

Other Liability HHI

Figure 16 provides a graph of the HHI for Illinois other liability insurance from 2001 through 2005. The figure indicates that the market for other liability insurance in Illinois continues to be very competitive.

Figure 16

**Illinois Market Concentration - Other Liability
(2001 - 2005)**

Figures 17 and 18 show the top ten Illinois other liability writers and their market shares for 2005 and 2004.

American Home Assur. Co.	55,178	45,550	1.7%	70.2%	6.1%	5.8%	3.9%

Losses incurred, defense and cost containment expenses incurred and taxes, licenses and fees are shown as a percent of earned premium. Commission and brokerage expenses are shown as a percent of written premium.

The top ten Illinois other liability writers and their market shares for 2005 are:

Underwriters at Lloyds London	36.7%
Continental Casualty Company	15.0%
Illinois State Bar Assoc Mutual Insurance Company	13.0%
Chicago Insurance Company	3.2%
American Guarantee & Liability Insurance Company	3.1%
Interstate Fire & Casualty Company	3.1%
Executive Risk Indemnity Inc.	2.4%
Great American Insurance Company	2.2%

Founders Insurance Company	2.0%
First Financial Insurance Company	1.7%
Percent of Total Market	82.4%

In addition to the top ten writers for the entire other liability line, this section also contains information for four specific classes that were mentioned in the Cost Containment Act: liquor liability, lawyers' professional liability, day-care liability, and home day-care liability.

In 2005, six companies wrote more than \$1 million in premium in the liquor liability market. In 2004, five companies reported premium in excess of \$1 million. However, even with these changes, the Division has detected no drastic price increases or availability issues. In 2004, the surplus lines market wrote 13 policies of liquor liability insurance. The average premium for these 13 policies was \$8,789. Even though the average premium increased substantially from 2004, the liquor liability market in Illinois remains strong, viable and competitive.

The top 5 writers in the liquor liability market are:

- Underwriters at Lloyds London
- Founders Insurance Company
- First Financial Insurance Company
- Illinois Casualty Company
- Springfield Fire and Casualty Company

In 2005, Underwriters at Lloyds London was the top writer of lawyers' professional liability insurance, writing in excess of \$37.8 million of direct written premium. The Continental Casualty Company wrote approximately \$16.9 million and Illinois State Bar followed with premium in excess of \$15.3 million. The next eight companies each wrote in excess of \$1 million in premium, as premiums increased sharply. In 2004, the surplus lines market wrote only 127 policies and \$6,987,676 in premium. This is an increase of 5 policies from 2004. The lawyers' professional liability market is dominated by a few companies and is one of the markets watched closely by the Division.

The top 10 writers of lawyers' professional liability insurance are:

- Underwriters at Lloyds London
- Continental Casualty Company
- Illinois State Bar Assoc. Mutual Insurance Company
- Chicago Insurance Company
- American Guarantee & Liability Insurance Company
- Interstate Fire & Casualty Company
- Executive Risk Indemnity Inc.
- Great American Insurance Company
- General Star National Insurance Company
- Medmarc Casualty Insurance Company

In 2005, forty eight admitted insurers reported day-care liability data for Illinois. This is 3 less

than in 2004. The surplus lines market wrote 437 policies and \$1,631,044 in day-care liability premium during 2005. This was an increase of 142 policies from 2004 and \$1.1 million more in premium.

The top four admitted writers of day-care liability insurance are:

West Bend Mutual Insurance Company
Philadelphia Indemnity Insurance Company
Capitol Indemnity Corporation
Markel Insurance Company

In 2005, twenty three admitted insurers of home day-care liability reported data for Illinois.

The top five admitted writers of home day-care liability insurance are:

State Farm Fire & Casualty Company
Country Mutual Insurance Company
Allstate Indemnity Company
Allstate Insurance Company
IMT Mutual Insurance Company

Market Shares of Residual Market Mechanisms

States establish residual market mechanisms to provide coverage for consumers who are unable to buy coverage in the voluntary market. If a marketplace does not function well, there will be an inordinate number of consumers in residual market programs. This is because insurers will tighten their underwriting standards, charge prices that are higher than what consumers can get in the residual market program, or stop writing business altogether in states where market problems persist.

Illinois residual market mechanisms provide essential insurance coverage for the hard-to-place risk, at rate levels approved by the Division. Illinois has residual market mechanisms for three lines of insurance: property, automobile, and workers' compensation.

Property - The Illinois FAIR Plan Association (FAIR Plan)

Fire and homeowners' insurance are placed directly through the FAIR Plan. Both dwelling and commercial insurance are available. Insurance companies share in the FAIR Plan's profits and losses in proportion to their voluntary market shares.

In Illinois, property insurance is widely available in the voluntary marketplace and only a very small percentage of consumers obtained coverage through the FAIR Plan. In addition, Illinois consumers are not at a coverage disadvantage when they buy insurance from the FAIR Plan, as is the case in many other states. In these other states, property residual market programs offer only dwelling fire or basic homeowners' policies. Illinois has one of the most progressive FAIR Plans

in the nation. Through the FAIR Plan, Illinois consumers can buy virtually the same coverages that are available in the voluntary marketplace, including guaranteed replacement cost, sewer back-up, earthquake, and building ordinance and law endorsements.

Figure 19 shows the amount of dwelling and homeowners’ written premium that the FAIR Plan made up as a percent of all dwelling and homeowners’ premium written in Illinois from 2001 through 2005.

Figure 19

Written Premiums for Illinois FAIR Plan (2001-2005)

	Amount of Written Premiums	As % of Total Written Premiums
2001	\$4,962,000	0.20%
2002	\$7,104,000	0.20%
2003	\$9,800,000	0.49%
2004	\$11,030,119	0.52%
2005	\$9,073,367	0.41%

Source: Premium amounts provided by Illinois FAIR Plan

Automobile - The Illinois Automobile Insurance Plan (Auto Plan)

Private passenger automobile risks are assigned to private passenger automobile insurers on a rotational basis in proportion to their voluntary market shares. Assignments stay with the company and are not shared with other writers. Commercial automobile risks are placed through servicing companies. Losses are divided among the voluntary writers of commercial automobile insurance in proportion to their share of the voluntary business.

Figure 20 shows the 2001 through 2005 market shares for the Illinois Automobile Insurance Plan compared to nationwide data. The percent of written car-years is derived by dividing the number of written car-years insured through the residual market by the total number of written car-years insured through the voluntary market. Note that Illinois has had a much smaller percentage of automobiles in the residual market than the nationwide composite.

The percent of insured automobiles in the Illinois Automobile Insurance Plan was four tenths of a percent of the total market in 2005. This figure reinforces the fact that automobile insurance in Illinois is extremely competitive in the voluntary market.

Figure 20 Percent of Automobiles in Illinois Assigned Risk Plan and the United States Composite Automobile Residual Market (2000-2005)

	2001	2002	2003	2004	2005
Illinois	0.03%	0.05%	0.06%	0.05%	0.04%
Nationwide	0.43%	0.52%	0.54%	1.43%	1.27%

Source: AIPSO Facts 2005 (based on liability car-years)

Workers' Compensation - The Illinois Workers' Compensation Assigned Risk Pool (Pool)

Several insurers act as servicing carriers for the Illinois Workers' Compensation Assigned Risk Pool. Losses are divided among the voluntary writers of workers' compensation in proportion to their shares of the voluntary business.

Figure 21 shows the percent of Illinois workers' compensation premiums written through the Pool from 2001 through 2005. The chart shows the amount of business being written in the residual market. During 2005, only 6.2 percent of Illinois direct premiums written for workers' compensation were written through the Pool.

The numbers illustrated in Figure 21 are from the NCCI and may not reconcile with numbers found in previous reports.

Figure 21 Percent of Illinois Workers' Compensation Written Through the Pool (2001-2004)

Participation in Alternative Risk Transfer Mechanisms

Traditionally, the level of participation in alternative markets is an indicator of how well the admitted market is doing at providing coverage, or providing coverage at prices consumers perceive to be reasonable. Therefore, if we are to assess the insurance marketplace in terms of availability, we must look at the level of activity in these alternative markets.

One problem with the non-admitted market is that there are few means by which it can be monitored. Because of the Division's limited authority over many of the alternative mechanisms, the number of risks placed and the amount of premium written cannot be assessed and a complete picture of this aspect of the insurance marketplace is unattainable. This problem has become more prevalent as the size of the transfer of risk alternative markets continues to grow.

Surplus lines refers to insurance written by a non-admitted (unlicensed) insurer through a licensed surplus lines producer. The licensed producer must exercise due diligence in protecting the insured since the Division has no jurisdiction over unlicensed companies and the Illinois Insurance Guaranty Fund provides no protection for the consumer. Thus, it is the producer and not the Division who must determine the company's financial stability and standards of management prior to submitting the risk.

Figure 29 shows the number of policies written in Illinois from 2001 to 2005 through surplus lines producers for homeowners', private passenger auto liability and physical damage, commercial auto liability, medical malpractice and general liability coverage. Of the 892 policies for medical malpractice, 356 are specifically for doctors and 22 dentists. (The term "general liability" used in this section equates closely to the term "other liability" used in other areas of this report). The data to date in 2006 indicates that this year's growth has leveled and is starting to decline.

Figure 29**Surplus Lines - Number of primary and excess policies written in Illinois (2001 - 2005)**

Line of Business	2001 Illinois Policy Count	2002 Illinois Policy Count	2003 Illinois Policy Count	2004 Illinois Policy Count	2005 Illinois Policy Count

INEX (previously the Illinois Insurance Exchange) provides a market for direct insurance and reinsurance. It is comprised of syndicates which underwrite and insure risks, and brokers who are authorized to place business with those syndicates. Fashioned after Lloyd's of London, INEX serves as a facilitator, record keeper and regulator for the operations of its members. INEX submits an annual financial statement to the Division reflecting both its combined financial position and the financial position of each individual syndicate.

Insurance Pools are groups that join together for the purpose of sharing certain risks on an agreed-upon basis. Participants may consolidate their risk exposures without being subject to the same regulatory requirements as admitted insurers. Pools organized under the following Acts are allowed in Illinois:

The Workers' Compensation Act allows entities that are members of a trade association, or that have similar risk characteristics, to form a risk-sharing pool. Each pool must submit annual financial statements, CPA audit reports, and actuarial opinions to the Division and are subject to examination by the Director.

The Religious and Charitable Risk Pooling Trust Act permits entities having an IRS 501c(3) exemption (a non-profit entity), or hospitals owned and operated by a unit of local government, to form a trust to pool their risks. These trust funds can only operate with prior approval of the Director of Insurance. The trusts must make annual CPA audit reports to the Division and are subject to examination by the Director.

The Intergovernmental Cooperation Act enables units of local government to enter into a pooling arrangement with other similar entities for the purpose of risk sharing. These pooling arrangements are not regulated by the Division, however, they must register with the Division and file annual audited financial statements.

Risk Retention and Purchasing Groups are allowed under the Federal Liability Risk Retention Act of 1986. This Act eliminated barriers to group self-insurance programs by allowing them to

buy group liability insurance. At the end of year 2005, there were 415 purchasing groups and 91 foreign registered risk retention groups.

Captive Insurance Companies may be formed by a company to insure its own risks and exposures, by an association to insure its member organizations, or by industrial insured groups. Illinois captives are regulated by the Division, are required to file certain financial information with the Division, and are subject to examination by the Director.

Self-insurance occurs when individuals or businesses retain their own risks. Entities that self-insure are under no obligation to report premiums, losses, or expenses to any statistical association or regulatory body.

Profitability

In monitoring competition in general and price performance in particular, the Division does not examine individual insurer prices for appropriateness. To do so is virtually impossible. Instead, it monitors the effectiveness of competition, examining the pattern of profits throughout the market.

In examining profitability, the Director must balance the seemingly divergent concerns of consumers and insurers. To protect consumers, rates must not be excessive. There is a fine line between rates that are excessive and rates that are inadequate, especially since insurance policies must be priced long before the results of the pricing decisions are known.

The Division must also be concerned about the long-term viability of the insurance marketplace, including the financial viability of the companies that insure consumers.

Illinois-specific Underwriting Results Compared to Countrywide Results

For each of the coverages listed below, this section contains:

- combined underwriting results for business written in Illinois and business written countrywide;
- a five-year trend for Illinois losses as a percent of premiums earned, compared to the five-year trend for countrywide losses.

Personal Lines Insurance

Figure 30 shows the percentage change in the Consumer Price Index during the previous twelve months ending January 2007 for automobile and homeowners insurance and related items. The personal lines of insurance are homeowners and private passenger automobile. The CPI for homeowners insurance fell by 0.9 from 2005 to 2006, while automobile insurance rose by 0.6 percent.

Figure 30

Percent Changes in Consumer Price Index for Automobile and Household Insurance, and Related Items

	Percent Change from 2004 to 2005
All items	3.0%
Household Insurance and Related Items	
Tenants' and Household Insurance	3.2%
Auto Insurance and Related Items	
Motor Vehicle Insurance	3.5%
Motor Vehicle Body Work	2.5%
Total Medical Care	4.3%
Physicians Services	3.9%
Hospital Services	5.3%

In **Figures 31** through **42** the “countrywide” figures are the aggregate amounts for Illinois-licensed insurers’ nationwide underwriting results. This data comes from the Insurance Expense Exhibit Part III.

Figure 31 shows a comparison of the underwriting results of homeowners insurance written in Illinois with that written nationwide during 2005. As figure 31 shows, incurred losses in Illinois for the year were much lower than the nationwide loss ratio, while defense and cost containment expenses incurred were also less than the nationwide figure.

Figure 31

Homeowners' Underwriting Results (2005)

Homeowners (\$000 omitted)	Illinois*	Countrywide**
Direct written premiums	\$2,220,523	\$42,524,047
Direct earned premiums	2,198,598	41,102,624
Expenses (% earned premium)		
Incurring losses	45.6%	68.8%
Def. & cost cont. exp. incurred	1.0%	1.5%
Comm./brokerage	13.8%	13.5%
Taxes, licenses & fees	1.7%	2.6%

**Source: NAIC State Data Network 2005 Insurance Expense Exhibit Part III Illinois-licensed insurers.

Figure 36 compares the five-year trend for loss percentage for Illinois and countrywide commercial automobile liability. The trend over the past five years in loss percentages in Illinois has been very similar to losses countrywide.

Figure 36

Commercial Auto Liability Losses as a % of Premiums Earned (2001-2005)

Medical Malpractice

Figure 37 shows the underwriting results for the medical malpractice market in Illinois and countrywide for 2005. Although medical malpractice losses in Illinois remained greater than losses countrywide, the loss ratio continues to improve.

Figure 37

Medical Malpractice Underwriting Results (2005)

Medical Malpractice (\$000 omitted)	Illinois*	Countrywide**
Direct written premiums	\$608,956	\$5,459,235
Direct earned premiums	602,990	5,410,106
Expenses (% earned premium)		
Incurred losses	84.8%	50.7%
Def. & cost cont. exp. incurred	24.6%	25.0%
Comm./brokerage	5.9%	6.6%
Taxes, licenses & fees	0.8%	1.6%

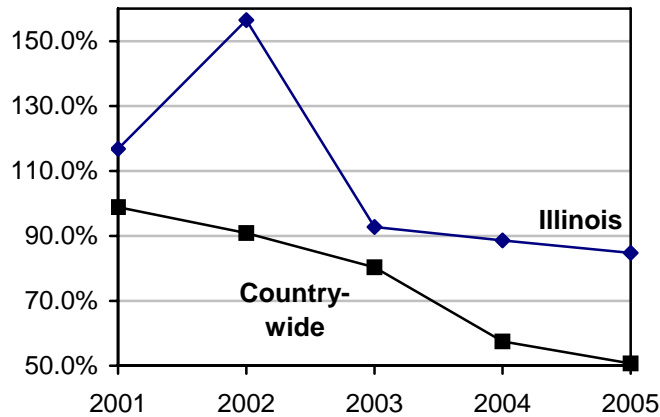

*Source: NAIC State Data Network, 2005 Illinois State Page Exhibit

**Source: NAIC State Data Network 2005 Insurance Expense Exhibit Part III, Illinois-licensed insurers.

Figure 38 compares the five-year loss percentages trend for Illinois and countrywide medical malpractice insurance. After soaring to over 150% of earned premium in 2002, losses in Illinois dropped to below 90 percent, but still trail nationwide losses by approximately 34.1 percent.

Figure 38

Medical Malpractice Losses as a % of Premiums Earned (2001-2005)

Other Liability

Figure 39 compares the underwriting results between Illinois and countrywide for the other liability line of business.

Figure 39

General Liability Underwriting Results (2005)

Other Liability (\$000 omitted)	Illinois*	Countrywide**
Direct written premiums	\$3,050,268	\$38,752,385
Direct earned premiums	3,080,844	37,911,643
Expenses (% earned premium)		
Incurring losses	86.0%	69.4%
Def. & cost cont. exp. incurred	17.4%	16.8%
Comm./brokerage	7.8%	12.0%
Taxes, licenses & fees	1.8%	2.3%

**Source: NAIC State Data Network 2005 Insurance Expense Exhibit Part III, Illinois-licensed insurers.

Figure 40 compares the five-year trend for loss percentages for Illinois and countrywide for other liability insurance. Losses as a percent of earned premium in Illinois in the other liability line of business remained higher than losses nationwide in 2005.

Figure 40

Other Liability Losses as a % of Premiums Earned (2001-2005)

Workers Compensation

In order to slow the growth in workers' compensation claims costs during the last part of the 1980's, many states passed new laws that made it easier to manage medical costs and oversee the treatment plan and the return-to-work process. Larger deductibles, which made employers more concerned about safety, along with better fraud prevention also helped hold claim costs down.

However, from 1997 to 2000, workers' compensation losses rose dramatically before retreating in 2001. Liberty Mutual conducted a study that found that rising claim costs had been driven by a widening definition of workplace injuries, more expensive medical treatments and a growing number of visits to medical practitioners. But while claim costs had risen, the number or frequency of claims has been declining, 38% since 1990.

Figure 41 shows a comparison of the underwriting results in 2005 in the workers compensation line of business between Illinois and the nation.

Figure 41

Workers Compensation Underwriting Results (2005)

Workers Compensation (\$000 omitted)	Illinois*	Countrywide**
Direct written premiums	\$2,498,214	\$36,282,553
Direct earned premiums	2,469,734	35,291,722
<i>Expenses (% earned premium)</i>		
Incurring losses	74.2%	64.7%
Def. & cost cont. exp. incurred	6.5%	6.8%
Comm./brokerage	8.6%	7.0%
Taxes, licenses & fees	2.9%	5.5%

**Source: NAIC State Data Network 2005 Insurance Expense Exhibit Part III, Illinois-licensed insurers.

Figure 42 shows workers' compensation losses as a percent of earned premium for the years 2001 through 2005. Workers' compensations losses as a percent of earned premium in Illinois rose above nationwide losses in 2004 and 2005.

Figure 42

Workers' Compensation Losses as a % of Premiums Earned (2001-2005)

Reliability

In determining whether the overall marketplace is viable, the Division must consider:

- Profitability.
- Financial Solvency Regulation.

Businesses that provide a financial service must be financially sound. An insurance contract has little value to the insured if there is no guarantee that the insurance company will have the money to pay claims when needed.

As discussed earlier, the Division must balance the seemingly divergent concerns of consumers and insurers. While we must ensure that consumers are able to buy insurance at a reasonable price, we must also ensure the overall viability of the marketplace.

One measure of a company's financial performance is its profitability. It must generate enough profit to survive and succeed. In a given month, if expenses exceed income, they must be paid from the reserve fund. If the trend continues, reserve funds run out causing the business to collapse. Therefore, it is imperative that insurance companies manage income and expenses to assure profitability and survival.

A company that can offer insurance coverage at competitive prices and reap adequate profits as an ongoing concern is considered to be financially viable. When the majority of insurers in the market are competitive and profitable, the market is considered to be financially strong.

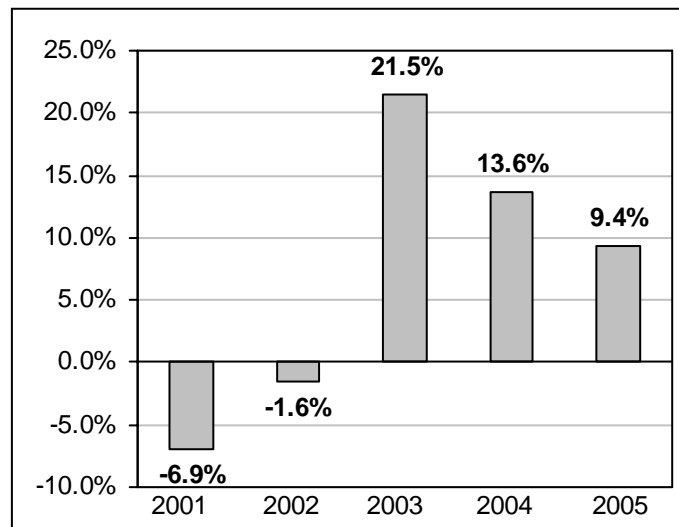

Profitability

Change in Policyholders Surplus

One measure of overall profitability is the change in policyholders' surplus from one year to the next. Policyholders' surplus is made up of: 1) underwriting gains or losses; 2) investment gains or losses; and 3) net contributed capital and other surplus changes.

Figure 43 shows the percent change in policyholders' surplus for the Illinois-licensed property/casualty industry as a whole over the past five years. After consecutive years of negative growth since 2000, the industry's surplus increased the last three years.

Figure 43
Percent Change in Policyholders' Surplus (2001-2005)

Source: NAIC State Data Network

Figure 44 shows income from investments, net income, unrealized capital gains/losses and policyholders' surplus from 2001 to 2005. The property/casualty industry has experienced significant increases in net income and unrealized capital gains since 2002.

Figure 44
Net Investment Income Earned, Net Income, Unrealized Capital Gains/Losses and Policyholders' Surplus 2001-2005 (in millions)

	2001	2002	2003	2004	2005
Net Investment gain	\$51,573	\$39,995	\$40,893	\$44,952	\$53,915
Net Income	(3,971)	11,485	27,199	36,488	39,675
Unrealized Capital Gains/Losses	(19,755)	(26,485)	30,624	17,189	4,096
Policyholders' Surplus	299,868	295,137	365,589	408,140	441,620

Source: NAIC State Data Network

Underwriting Gains/Losses

Figure 45 shows the aggregate underwriting gain/loss for Illinois-licensed insurers from 2001-2005. After experiencing an underwriting gain in 2004, the industry realized a loss in 2005. Losses and loss expenses were 75 percent of premiums earned.

Figure 45
Aggregate Net Underwriting Gain/(Loss) (in millions)
(2001-2005)

	2001	2002	2003	2004	2005
Premiums earned	\$260,142	\$290,397	\$325,159	\$344,724	\$344,913
Losses incurred	197,360	198,964	200,092	206,102	213,774
Loss expenses incurred	33,844	36,981	41,892	44,217	45,351
Other underwriting expenses incurred	72,730	79,362	85,604	88,666	90,570
Dividends to policyholders	<u>1,203</u>	<u>1,121</u>	<u>1,197</u>	<u>978</u>	<u>1,040</u>
Net underwriting gain/loss	<u>(\$44,995)</u>	<u>(\$26,031)</u>	<u>(\$3,626)</u>	<u>4,761</u>	<u>(5,822)</u>

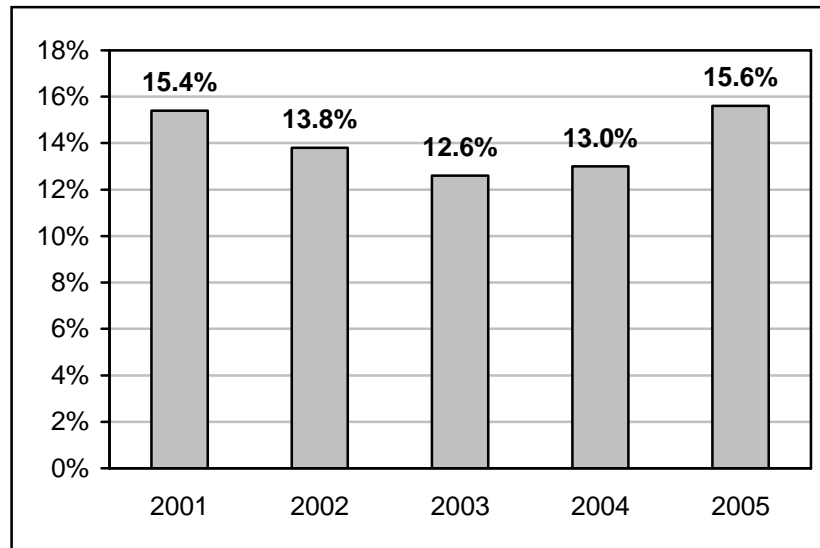

Source: NAIC State Data Network

Net Investment Income Ratio

One component of surplus is income derived from investments. The net investment income ratio measures income from invested assets relative to earned premiums. It is calculated by dividing net investment income (income from invested assets less investment expenses and depreciation on real estate) by earned premium.

Figure 46 shows the net investment income ratio for Illinois-licensed property/casualty insurers during the most recent five-year period. This ratio shows the investment income component of overall profitability.

Figure 46
Net Investment Income Ratio (2001-2005)

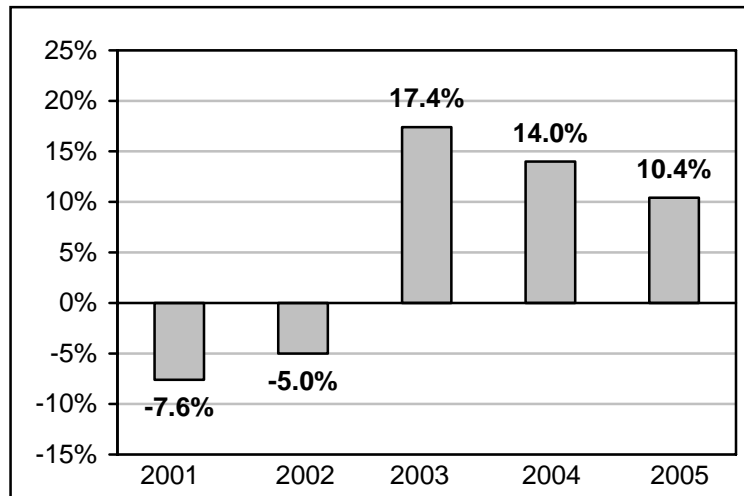

Source: NAIC State Data Network

Return on Policyholders' Surplus

Another measure of overall profitability is the return on policyholders' surplus. It is the sum of net income after dividends and taxes and unrealized capital gains divided by the average of the current year and prior year's policyholders' surplus.

Figure 47 shows the aggregate return on policyholders' surplus from 2001 through 2005 for the Illinois-licensed property/casualty industry combined. After producing a 17.4 percent return on policyholder surplus in 2003, return on policyholders' surplus has declined steadily to 10.4 percent in 2005.

Figure 47
Return on Policyholders' Surplus (2001-2005)

Source: NAIC State Data Network

Financial Solvency Regulation

Although the Division cannot guarantee that Illinois-licensed insurers are profitable, we monitor the financial solvency and strength of Illinois-licensed insurers in several ways including:

1. maintaining a staff of trained accountants and specialists who identify companies developing financial difficulties so that the Division can step in to minimize potential losses to Illinois policyholders;
2. working closely with insurance companies with identified financial difficulties to minimize potential risk to policyholders while attempting to resolve manageable problems or determine the need for rehabilitation or liquidation;
3. employing field examiners for on-site evaluation of insurance company financial records;
4. reviewing operations and compliance issues through scheduled, targeted, and special exams of known or suspected problems;
5. maintaining a staff of actuaries who monitor the adequacy of loss reserves, cash flow testing, and proper valuation of assets;
6. licensing and registering the many types of insurers, surplus lines producers, and risk sharing pools authorized by the Illinois Insurance Code and related Acts;
7. investigating unauthorized organizations or individuals thought to be conducting illegal insurance operations and taking regulatory action to remove them from the market to protect consumers from fraudulent activities.

SUMMARY and RECOMMENDATION

In the first years of this decade, including most of 2005, trends in the medical malpractice market may have negatively impacted the quality and availability of healthcare in Illinois. Problems in the medical malpractice market are caused by a variety of factors. In August 2005, Governor Blagojevich signed a medical malpractice reform bill that includes a cap on non-economic damages, insurer information transparency requirements, and various insurance regulatory reforms, all of which are intended to promote insurer competition.

Rate pressures continued in 2005 for coverage in personal lines policies. Many states again suffered tremendous personal and property losses due to catastrophic natural events such as tornadoes, hurricanes and flooding. Despite losses nationally, insurer losses as a percent of earned premium in both the homeowners' and automobile markets in Illinois have remained level or slightly declined since 2004. Nationwide homeowners' losses increased in 2005.

Insurer losses in the workers' compensation line of business have been falling since 2000. Since this decline, the losses have leveled around the 70% level and appear to be having a positive effect on the workers' compensation market. The residual market penetration in 2005 was 1.6% points lower than in 2005. Again in 2005 the take out credit exceeded \$100 million reaching \$114 million. The fact that the residual market share continues to decrease and the take out credit grows is a strong indicator that the voluntary workers' compensation market is viable and competitive.

The surplus lines market in Illinois experienced a dramatic increase from 2002 through 2004. In 2002 this market wrote just over \$511 million in premium and in 2004 the surplus lines market wrote in excess of \$1.012* billion in premium. In 2005 this growth has leveled, reaching \$1.016 billion, however most lines have experienced a minor decrease. The CGL line continued to increase reaching \$287 million which keep the overall premium from decreasing.

The Division will continue to strive for the optimal environment where insurance is accessible and affordable, and where the market is conducive to fair and lively competition. The Illinois property and casualty industry has proven flexible with market changes. External factors such as terrorism, a significant increase in the cost of goods and services, economic factors, increased reinsurance premiums, and other factors continue to contribute to the operating results in 2005.

The open competition system in Illinois allows insurers to succeed and allows consumers to purchase insurance at a reasonable price. Successful insurers will likely be those that are customer-oriented, pay attention to the demands of the technological age, have a contingency plan, and use common sense in underwriting, expansion, and management policies. The Division does not make recommendations for regulatory changes in this Report. The Division will continue to identify problems and vigilantly monitor the insurance marketplace, reporting and making recommendations as necessary.

* This amount was shown incorrectly in the 2006 Annual Report.

35	Surplus as regards policyholders	441,619,840,117	403,823,471,352
36	Totals	1,225,785,466,199	1,133,626,268,768

**APPENDIX C – Consolidated Statement of Income for Illinois-licensed
Property/Casualty Insurers for the year ending December 31, 2005**

STATEMENT OF INCOME

	1 Current Year	2 Prior Year
UNDERWRITING INCOME		
1 Premiums earned	344,912,767,732	343,966,075,587
2 Losses incurred	213,774,427,488	206,474,346,609
3 Loss expenses incurred	45,350,562,100	44,068,836,425
4 Other underwriting expenses incurred	90,569,720,032	88,902,972,884
5 Aggregate write-ins for underwriting deductions	568,959,571	165,965,134
6 Total underwriting deductions	350,263,669,197	339,612,121,060
7 Net income of protected cells	0	0
8 Net underwriting gain (loss)	(5,350,901,479)	4,353,954,545
INVESTMENT INCOME		
9 Net investment income earned	45,209,835,891	36,822,740,407
10 Net realized capital gains (losses) less capital gains tax of \$(1)	8,704,937,211	7,990,321,712
11 Net investment gain (loss)	53,914,773,095	44,813,062,119
OTHER INCOME		
12 Net gain (loss) from agents' or premium balances charged off	(1,271,379,103)	(971,971,252)
13 Finance and service charges not included in premiums	1,835,718,674	1,769,236,239
14 Aggregate write-ins for miscellaneous income	(585,125,550)	(1,414,552,299)
15 Total other income	(20,785,988)	(617,287,316)
Net income before dividends to policyholders, after capital gains tax and before all other federal and foreign income taxes	48,543,085,636	48,549,729,344
17 Dividends to policyholders	1,040,313,811	978,221,059
Net income, after dividends to policyholders, after capital gains tax and before all other federal and foreign income taxes	47,502,771,824	47,571,508,286
19 Federal and foreign income taxes incurred	7,827,420,968	11,817,439,717
20 Net income	39,675,350,856	35,754,068,570
CAPITAL AND SURPLUS ACCOUNT		
21 Surplus as regards policyholders, December 31 prior year	403,823,474,973	358,533,068,651
22 Net income	39,675,350,856	35,754,068,570
23 Net transfers (to) from protected cell accounts	77,371	0
24 Change in net unrealized capital gains or (losses) less capital gains tax of \$(1)	4,095,613,501	16,427,814,420
25 Change in net unrealized foreign exchange capital gain (loss)	(261,487,006)	(57,288,708)
26 Change in net deferred income tax	72,290,307	581,537,258
27 Change in nonadmitted assets	(333,106,954)	393,538,438
28 Change in provision for reinsurance	268,627,390	(101,995,461)
29 Change in surplus notes	336,221,600	1,673,319,583
30 Surplus (contributed to) withdrawn from protected cells	0	0
31 Cumulative effect of changes in accounting principles	(905,903,954)	54,085,441
32.1 Capital changes paid in	27,834,970	63,224,963
32.2 Capital changes transferred from surplus (stock dividend)	4,616,970	46,853,474
32.3 Capital changes transferred to surplus	(1,168,003,930)	(4,682,596)
33.1 Surplus adjustments paid in	13,421,389,780	9,487,948,770
33.2 Surplus adjustments transferred to capital (stock dividend)	(7,687,084)	(107,003,041)
33.3 Surplus adjustments transferred from capital	1,137,750,490	11,272,238
34 Net remittances from or (to) home office	(19,362,431)	222,716,945
35 Dividends to stockholders	(16,238,009,597)	(15,901,163,215)
36 Change in treasury stock	20,854,285	(938,922,675)
37 Aggregate write-ins for gains and losses in surplus	(2,330,701,255)	(2,314,918,085)
38 Change in surplus as regards policyholders for the year	37,796,365,321	45,290,406,327
39 Surplus as regards policyholders, December 31 current year	441,619,840,291	403,823,474,974

APPENDIX D – Consolidated Exhibit of Premiums and Losses in the State of Illinois for All Illinois-licensed Property/Casualty Insurers During 2005

EXHIBIT OF PREMIUMS AND LOSSES

BUSINESS IN THE STATE OF ILLINOIS DURING THE YEAR 2005
