III. METHODOLOGY

The Market Conduct Examination process places emphasis on an insurer's systems and procedures used in dealing with insureds and claimants. The eighteen lines of business reviewed in this examination are: Standard and Nonstandard Private Passenger Automobile, Homeowner, Renter, Dwelling Fire, Personal Inland Marine, Personal Umbrella, Personal Toys, Commercial Automobile, Commercial Agribusiness, Commercial Farmowner, Commercial Property Fire, Commercial Inland Marine, Commercial Umbrella, Commercial Business Owner, Commercial General Liability, Commercial HV Custom Pak Product, Commercial HV Package and Commercial Workers' Compensation. The report is a collective report with group samples that combine all companies. The group samples were made on a proportional basis between each individual company.

The scope of this examination was a comprehensive examination including a review of the following areas:

- A. Company Operations and Management
- B. Complaints
- C. Producer Licensing
- D. Risk Selection
- E. Underwriting
- F. Claims

The review of the categories was accomplished through examination of material related to the Company's operations and management, complaint files, producer lists, underwriting files, risk selection files and claim files, as well as interviews with various Company personnel and Company responses to the Coordinator's Handbook, Information Requests and Criticisms. Each of the categories listed above was examined for compliance with Illinois Department of Insurance (ILDOI) regulations and applicable state laws.

The following method was used to obtain the required samples and to ensure a statistically sound selection. Surveys were developed from Company-generated Excel spreadsheets. In some instances, the Company was requested to provide separate spreadsheets for commercial files and personal files in lines of business that included both. Random statistical file selections were generated by the examiners from these spreadsheets. In the event lines of business were combined for review, a random selection of files was made on a proportional basis. In the event the number of files was too low for a random sample, the sample consisted of the universe of files.

Company Operations and Management

A review was conducted of the Company's underwriting and claims guidelines and procedures, policy forms, third party vendor oversight, internal audits, certificates of authority, previous market conduct examinations and annual statements. These documents were reviewed for compliance with Illinois statutes and the Illinois Administrative Code.

There were no exceptions noted.

Complaints

The Company was requested to identify all consumer and ILDOI complaints received during the examination period (plus two years prior for trending purposes) and provide copies of the complaint logs. All complaint files and logs were received. The files were reviewed for compliance with Illinois statutes and the Illinois Administrative Code.

Producer Licensing

The Company was requested to provide a list of all producers licensed to do business in the State of Illinois and a list of those producers paid commission in Illinois during the examination period. The Company identified a universe of producers. A random sample of producers was requested, received and reviewed in comparison to the State of Illinois licensing database and for compliance with Illinois statutes and the Illinois Administrative Code. New issued business was also reviewed to determine if solicitations were made by duly licensed persons.

Risk Selection

The Company was requested to provide a list of all policies in the following categories during the examination period: company initiated cancellations, cancellations for non-payment of premium, and nonrenewals. The Company identified the universe of policies. Due to difficulties with the data provided, primarily due to the way the Company maintains the data, the examiners had to make several requests prior to receiving the appropriate universe. Random samples of the files were made by the examiners and submitted to the Company. The files were received and reviewed unless the small population of files required an examination of the entire universe. Also, due to disqualifying factors, some individual files in the samples were replaced when necessary. The files were reviewed to ensure that the policies were processed in compliance with Illinois statutes and the Illinois Administrative Code. The review examined compliance with statutory requirements, the accuracy and validity of reasons given and looked for any possible unfair discrimination.

Underwriting

The Company was requested to provide a list of all new business policies in the eighteen lines of business under review. The Company identified the universe of policies. Random samples of the files were made by the examiners and submitted to the Company. The files were received and reviewed. Also, due to disqualifying factors, some individual files in the samples were replaced when necessary. The files were reviewed to ensure that the policies were processed in compliance with Illinois statutes and the Illinois Administrative Code. The review included the premium rating of the sample policies for Standard and Nonstandard Private Passenger Automobile, Homeowner, Renter, Dwelling Fire and Workers' Compensation lines. New policies were also reviewed to determine the correct use of filed rates, use of filed forms, for compliance with company underwriting guidelines and to ensure that the coverage provided was as requested by the applicant.

Claims

The Company was requested to provide a list of all claims in various categories during the examination period, to include paid, denied, and closed without payment (CWP). The Company provided paid and CWP claims. Due to various disqualifying factors, some individual files in the samples were replaced with another file when necessary. The files were reviewed to ensure the claims were processed in compliance with the policy, Illinois statutes and the Illinois Administrative Code.
